**Thinking in Jazz** Mar 09 2021 A landmark in jazz studies, Thinking in Jazz reveals as never before how musicians, both individually and collectively, learn to improvise. Chronicling leading musicians from their first encounters with jazz to the development of a unique improvisatory voice, Paul Berliner documents the lifetime of preparation that lies behind the skilled improviser's every idea. The product of more than fifteen years of immersion in the jazz world, Thinking in Jazz combines participant observation with detailed musicological analysis, the author's experience as a jazz trumpeter, interpretations of published material by scholars and performers, and, above all, original data from interviews with more than fifty professional musicians: bassists George Duvivier and Rufus Reid; drummers Max Roach, Ronald Shannon Jackson, and Akira Tana; guitarist Emily Remler; pianists Tommy Flanagan and Barry Harris; saxophonists Lou Donaldson, Lee Konitz, and James Moody; trombonist Curtis Fuller; trumpeters Doc Cheatham, Art Farmer, Wynton Marsalis, and Red Rodney; vocalists Carmen Lundy and Vea Williams; and others. Together, the interviews provide insight into the production of jazz by great artists like Betty Carter, Miles Davis, Dizzy Gillespie, Coleman Hawkins, and Charlie Parker. Thinking in Jazz overflows with musical examples from the 1920s to the present, including original transcriptions (keyed to commercial recordings) of collective improvisations by Miles Davis's and John Coltrane's groups. These transcriptions provide additional insight into the structure and creativity of jazz improvisation and represent a remarkable resource for jazz musicians as well as students and educators. Berliner explores the alternative ways—aural, visual, kinetic, verbal, emotional, theoretical, associative—in which these performers conceptualize their music and describes the delicate interplay of soloist and ensemble in collective improvisation. Berliner's skillful integration of data concerning musical development, the rigorous practice and thought artists devote to jazz outside of performance, and the complexities of composing in the moment leads to a new understanding of jazz improvisation as a language, an aesthetic, and a tradition. This unprecedented journey to the heart of the jazz tradition will fascinate and enlighten musicians, musicologists, and jazz fans alike.

**Jazz and Psychotherapy** Sep 03 2020 Blending the insights of musicians and psychologists from D.W. Winnicott to Gregory Bateson to Ornette Coleman, Jazz and Psychotherapy is a groundbreaking exploration of improvisation that reveals its potential to transform our experience of ourselves and the challenges we face as a species. What we all share with the professional improvisers known as "psychotherapists" and "jazz musicians" is the reality of not knowing what those around us—or even we ourselves—are going to do next. Rather than avoiding it, however, these practitioners have learned to revere our inherent unpredictability as precisely the feature of human living that makes transformative change possible, fully incorporating it into the theories and practices that constitute their disciplines. Jazz and Psychotherapy provides a sophisticated but accessible overview of the revolutionary approaches to human development and creative expression embodied in these two seemingly disparate twentieth-century cultural traditions. Readers interested in music, psychotherapy, social psychology and contemporary theories of complexity will find Jazz and Psychotherapy engaging and useful. Its colorful synthesis of perspectives and multidimensional scope make it an essential contribution to our understanding of improvisation in music and in life.

**A Guide to Non-Jazz Improvisation** Mar 29 2020 The non-jazz improvisation series is a concept that germinated in Dick Weissman's mind while he was attending music school. He wrote a 15-piece arrangement of the old square dance tune, Cripple Creek, and wanted the trombone to take a solo as part of the arrangement. When the trombonist kept playing a bebop solo that was totally unsuitable for the chart, Dick realized that - in addition to the many musicians who do not improvise - there are even jazz musicians who don't know how to improvise outside the limits of their own stylistic backgrounds. The non-jazz improvisation series mostly includes new original tunes that are intended to show how to improvise in many musical styles, including: \* Blues \* Country \* American folk \* Latin-American \* World music including South American, Eastern European and Asian \* Odd meters (playing in a variety of time signatures) \* New Age \* Classical \* Folk-Rock In short, the books are an encyclopedia of virtually every musical style, excluding jazz.
