[Russian Spacesuits](#) Feb 25 2022 This is the very first ' inside story ' of a key part of the Soviet manned space programme, detailing the development of Soviet/Russian spacesuits. The authors, as participants in the programme, provide details of events, previously unknown in the West, including their technical development. These space suits were an important part of the many Soviet firsts in the space race – Yuri Gagarin 's flight, Valentina Tereskova, the first woman in space, the first space walk by Alexei Leonov, and the first transfer on orbit from one spacecraft to another. All previous books on Soviet manned space flights focus on the spacecraft and cosmonaut teams. This book provides a total overview of the successful Soviet/Russian development of space suits and subsequent space walks from Vostok to MIR and ISS.

Bering's Search for the Strait Feb 02 2020 Translation from Russian of an account of Vitus Bering's first expedition in 1725-1730 from St. Petersburg to Kamchatka in search of the straits between the Asia and North America. Includes glossary of Russian terms and references to previously unused Russian archival material.

The Scientific Sublime Dec 14 2020 The sublime evokes our awe, our terror, and our wonder. Applied first in ancient Greece to the heights of literary expression, in the 18th-century the sublime was extended to nature and to the sciences, enterprises that viewed the natural world as a manifestation of God's goodness, power, and wisdom. In *The Scientific Sublime*, Alan Gross reveals the modern-day sublime in popular science. He shows how the great popular scientists of our time--Richard Feynman, Stephen Hawking, Steven Weinberg, Brian Greene, Lisa Randall, Rachel Carson, Stephen Jay Gould, Steven Pinker, Richard Dawkins, and E. O. Wilson--evoke the sublime in response to fundamental questions: How did the universe begin? How did life? How did language? These authors maintain a tradition initiated by Joseph Addison, Edmund Burke, Immanuel Kant, and Adam Smith, towering 18th-century figures who adapted the literary sublime first to nature, then to science--though with one crucial difference: religion has been replaced wholly by science. In a final chapter, Gross explores science's attack on religion, an assault that attempts to sweep permanently under the rug two questions science cannot answer: What is the meaning of life? What is the meaning of the good life?

Charting the Russian Northern Sea Route Sep 30 2019 Translation of an account of the Arctic Ocean Hydrographic Expedition which systematically surveyed the arctic waters north of Siberia.

Alien Expedition Aug 02 2022 Audisee  eBooks with Audio combine professional narration and sentence highlighting to engage reluctant readers! In the third book in the series, young Alien Agent Zack Gaither is sent to Mongolia to liaise with his fellow agent Vraj, whom we met in *Camp Alien*. Vraj 's people, the Tigrizians, are exploring the area for evidence of dinosaurs, whom the Tigrizians believe to be their long-lost ancestors. Enter the Kaipa Kapa Syndicate, a mixture of bad guys, including the Gnairts who 'd previously tried to kill Zack and Vraj. The syndicate kidnaps the Tigrizians, and with the help of two local Mongolian kids, Zack and Vraj manage to free them and avoid being discovered.

[To Master the Boundless Sea](#) Jul 29 2019 As the United States grew into an empire in the late nineteenth century, notions like "sea power" derived not only from fleets, bases, and decisive battles but also from a scientific effort to understand and master the ocean environment. Beginning in the early nineteenth century and concluding in the first years of the twentieth, Jason W. Smith tells the story of the rise of the U.S. Navy and the emergence of American ocean empire through its struggle to control nature. In vividly told sketches of exploration, naval officers, war, and, most significantly, the ocean environment, Smith draws together insights from environmental, maritime, military, and naval history, and the history of science and cartography, placing the U.S. Navy's scientific efforts within a broader cultural context. By recasting and deepening our understanding of the U.S. Navy and the United States at sea, Smith brings to the fore the overlooked work of naval hydrographers, surveyors, and cartographers. In the nautical chart's soundings, names, symbols, and embedded narratives, Smith recounts the largely untold story of a young nation looking to extend its power over the boundless sea.
