Infectious Madness Nov 28 2019 A groundbreaking look at the connection between germs and mental illness, and how we can protect ourselves. Is it possible to catch autism or OCD the same way we catch the flu? Can a child's contact with cat litter lead to schizophrenia? In her eye-opening new book, National Book Critics Circle Award-winning author Harriet Washington reveals that we can in fact "catch" mental illness. In *Infectious Madness*, Washington presents the new germ theory, which posits not only that many instances of Alzheimer's, OCD, and schizophrenia are caused by viruses, prions, and bacteria, but also that with antibiotics, vaccinations, and other strategies, these cases can be easily prevented or treated. Packed with cutting-edge research and tantalizing mysteries, *Infectious Madness* is rich in science, characters, and practical advice on how to protect yourself and your children from exposure to infectious threats that could sabotage your mental and physical health.

Come as You Are Aug 30 2022 Researchers have spent the last decade trying to develop a 'pink pill' for women to function like Viagra does for men. So where is it? Well, for reasons this book makes crystal clear, that pill will never exist - but as a result of the research that's gone into it, scientists in the last few years have learned more about how women's sexuality works than we ever thought possible, and this book explains it all.

I Married a Mystic Jul 25 2019 *I Married a Mystic*—one woman's leap of faith to discover a love that never ends. It was a surprise to gutsy, Kirsten Buxton when Jesus appeared to her, announcing he would be her guide. At twenty-seven years of age, a serious bike accident had left her physically, psychologically, and emotionally devastated, with no control over her life. Having had no previous relationship with Jesus, she began studying *A Course in Miracles*, and developing trust in the Spirit within. Miraculously, world-renowned teacher of *A Course in Miracles*, David Hoffmeister, visited her hometown. Jesus told Kirsten to trust this man completely in order to experience a relationship like no other. Her courageous acceptance of this guidance opened her heart and mind in ways she never could have imagined. Throughout this diary of radical self-inquiry, Kirsten candidly exposes her fears, projections,

and private thoughts whilst on an epic adventure of holy relationship with a tirelessly happy mystic! A must read for those seeking to intimately apply non-dual spiritual teachings in every aspect of daily experience: in the bedroom, the bathroom, and even the supermarket. This profound and often humorous account is literally a 'how-to' guide for awakening.

Come as You Are Nov 01 2022 A NEW YORK TIMES BESTSELLER An essential exploration of women's sexuality that will radically transform your sex life into one filled with confidence and joy. After all the books that have been written about sex, all the blogs and TV shows and radio Q&As, how can it be that we all still have so many questions? The frustrating reality is that we've been lied to — not deliberately, it's no one's fault, but still. We were told the wrong story. *Come as You Are* reveals the true story behind female sexuality, uncovering the little-known science of what makes us tick and, more importantly, how and why. Sex educator Dr Emily Nagoski debunks the common sexual myths that are making women (and some men!) feel inadequate between the sheets. Underlying almost all of the questions we still have about sex is the common worry: 'Am I normal?' This book answers with a resounding Yes! We are all different, but we are all normal — and once we learn this, we can create for ourselves better sex and more profound pleasure than we ever thought possible. PRAISE FOR EMILY NAGOSKI 'As a literary work, Nagoski's book deserves plaudits for the rare achievement of merging pop science and the sexual self-help genre in prose that's not insufferably twee ... "You are normal!" doesn't sound much like a battlecry, but in a world keen to sexually homogenise women from the gap of their thighs to the shape of their mons pubis, the sentiment lands like a bomb.' The Guardian 'Come As You Are screams female empowerment loud and proud.' The Independent

Franchise: The Golden Arches in Black America Apr 01 2020 WINNER • 2021 PULITZER PRIZE IN HISTORY Winner • 2022 James Beard Foundation Book Award [Writing] The "stunning" (David W. Blight) untold history of how fast food became one of the greatest generators of black wealth in America. Just as *The Color of Law* provided a vital understanding of redlining and racial segregation, Marcia Chatelain's *Franchise* investigates the complex interrelationship between black communities and America's largest, most popular fast food chain. Taking us from the first McDonald's drive-in in San Bernardino to the franchise on Florissant Avenue in Ferguson, Missouri, in the

summer of 2014, Chatelain shows how fast food is a source of both power—economic and political—and despair for African Americans. As she contends, fast food is, more than ever before, a key battlefield in the fight for racial justice.

Raised by Animals Aug 18 2021 When it comes to family matters, do humans know best? Leading animal behaviorist Dr. Jennifer Verdolin argues otherwise in this eye-opening book. Welcome to the wild world of raising a family in the animal kingdom . . . sometimes shocking, often ingenious! Every species can surprise us: Chimps have a knack for minimizing temper tantrums, and owl chicks have a remarkable gift for sharing. A prairie vole knows exactly when his stressed-out partner needs a massage. And anyone who considers reptiles “cold-blooded” should consider the caecilian, a snakelike animal from Kenya: After laying eggs, the mother grows a fatty layer of skin, which her babies eat after hatching (not one of the book’s many lessons from the wild to be tried at home!). Along the way Verdolin challenges our often counterproductive beliefs about what families ought to be like and how we should feel. By finding common ground with our furry, feathered, and even slimy cousins, we can gain new insight on what “natural” parenting really means—and perhaps do a better job of forgiving ourselves for those days when we’re “only human”!

Unwell Women Jun 23 2019 A trailblazing, conversation-starting history of women’s health—from the earliest medical ideas about women’s illnesses to hormones and autoimmune diseases—brought together in a fascinating sweeping narrative. Elinor Cleghorn became an unwell woman ten years ago. She was diagnosed with an autoimmune disease after a long period of being told her symptoms were anything from psychosomatic to a possible pregnancy. As Elinor learned to live with her unpredictable disease she turned to history for answers, and found an enraging legacy of suffering, mystification, and misdiagnosis. In *Unwell Women*, Elinor Cleghorn traces the almost unbelievable history of how medicine has failed women by treating their bodies as alien and other, often to perilous effect. The result is an authoritative and groundbreaking exploration of the relationship between women and medical practice, from the “wandering womb” of Ancient Greece to the rise of witch trials across Europe, and from the dawn of hysteria as a catchall for difficult-to-diagnose disorders to the first forays into autoimmunity and the shifting understanding of hormones, menstruation, menopause, and conditions like endometriosis. Packed with character

studies and case histories of women who have suffered, challenged, and rewritten medical orthodoxy—and the men who controlled their fate—this is a revolutionary examination of the relationship between women, illness, and medicine. With these case histories, Elinor pays homage to the women who suffered so strides could be made, and shows how being unwell has become normalized in society and culture, where women have long been distrusted as reliable narrators of their own bodies and pain. But the time for real change is long overdue: answers reside in the body, in the testimonies of unwell women—and their lives depend on medicine learning to listen.

ADHD 2.0 Feb 09 2021 A revolutionary new approach to ADD/ADHD featuring cutting-edge research and strategies to help readers thrive, by the bestselling authors of the seminal books *Driven to Distraction* and *Delivered from Distraction* “An inspired road map for living with a distractible brain . . . If you or your child suffer from ADHD, this book should be on your shelf. It will give you courage and hope.”—Michael Thompson, Ph.D., New York Times bestselling co-author of *Raising Cain* World-renowned authors Dr. Edward M. Hallowell and Dr. John J. Ratey literally “wrote the book” on ADD/ADHD more than two decades ago. Their bestseller, *Driven to Distraction*, largely introduced this diagnosis to the public and sold more than a million copies along the way. Now, most people have heard of ADHD and know someone who may have it. But lost in the discussion of both childhood and adult diagnosis of ADHD is the potential upside: Many hugely successful entrepreneurs and highly creative people attribute their achievements to ADHD. Also unknown to most are the recent research developments, including innovations that give a clearer understanding of the ADHD brain in action. In *ADHD 2.0*, Drs. Hallowell and Ratey, both of whom have this “variable attention trait,” draw on the latest science to provide both parents and adults with ADHD a plan for minimizing the downside and maximizing the benefits of ADHD at any age. They offer an arsenal of new strategies and lifestyle hacks for thriving with ADHD, including

- Find the right kind of difficult. Use these behavior assessments to discover the work, activity, or creative outlet best suited to an individual’s unique strengths.
- Reimagine environment. What specific elements to look for—at home, at school, or in the workplace—to enhance the creativity and entrepreneurial spirit inherent in the ADHD mind.
- Embrace innate neurological tendencies. Take advantage of new findings about the brain’s default mode network and cerebellum, which confer major benefits for people with ADHD.
- Tap into the healing power of connection. Tips for

establishing and maintaining positive connection “the other Vitamin C” and the best antidote to the negativity that plagues so many people with ADHD. • Consider medication. Gets the facts about the underlying chemistry, side effects, and proven benefits of all the pharmaceutical options. As inspiring as it is practical, ADHD 2.0 will help you tap into the power of this mercurial condition and find the key that unlocks potential.

Rethink Apr 25 2022 "A brilliant and groundbreaking argument that innovation and progress are often achieved by revisiting and retooling ideas from the past rather than starting from scratch--from The Guardian columnist and contributor to The Atlantic, "--Baker & Taylor.

Drive Mar 13 2021 The New York Times bestseller that gives readers a paradigm-shattering new way to think about motivation from the author of *When: The Scientific Secrets of Perfect Timing* Most people believe that the best way to motivate is with rewards like money—the carrot-and-stick approach. That's a mistake, says Daniel H. Pink (author of *To Sell Is Human: The Surprising Truth About Motivating Others*). In this provocative and persuasive new book, he asserts that the secret to high performance and satisfaction—at work, at school, and at home—is the deeply human need to direct our own lives, to learn and create new things, and to do better by ourselves and our world. Drawing on four decades of scientific research on human motivation, Pink exposes the mismatch between what science knows and what business does—and how that affects every aspect of life. He examines the three elements of true motivation—autonomy, mastery, and purpose—and offers smart and surprising techniques for putting these into action in a unique book that will change how we think and transform how we live.

How Minds Change Dec 22 2021 A brain-bending investigation of why some people never change their minds—and others do in an instant—by the bestselling author of *You Are Not So Smart* What made a prominent conspiracy-theorist YouTuber finally see that 9/11 was not a hoax? How do voter opinions shift from neutral to resolute? Can widespread social change only take place when a generation dies out? From one of our greatest thinkers on reasoning, *HOW MINDS CHANGE* is a book about the science, and the experience, of transformation. When self-delusion expert and psychology nerd David McRaney began a book about how to change someone's mind in one conversation, he never expected to change his own. But then a diehard 9/11 Truther's conversion blew up his theories—inspiring him to ask not just how to persuade, but why we believe, from the eye of the beholder. Delving into the latest research of psychologists and neuroscientists, *HOW MINDS CHANGE* explores the limits of reasoning, the power of groupthink, and the effects of deep canvassing. Told with McRaney's trademark sense of humor, compassion, and scientific curiosity, it's an eye-opening journey among cult members, conspiracy theorists, and political activists, from Westboro Baptist Church picketers to LGBTQ campaigners in California—that ultimately challenges us to question our own motives and beliefs. In an age of dangerous conspiratorial thinking, can we rise to the occasion with empathy? An expansive, big-hearted journalistic narrative, *HOW MINDS CHANGE* reaches surprising and thought-provoking conclusions, to demonstrate the rare but transformative circumstances under which minds can change.

The Brain's Way of Healing Sep 26 2019 NEW YORK TIMES BESTSELLER The New York Times–bestselling author of *The Brain That Changes Itself* presents astounding advances in the treatment of brain injury and illness. Now in an updated and expanded paperback edition. Winner of the 2015 Gold Nautilus Book Award in Science & Cosmology In his groundbreaking work *The Brain That Changes Itself*, Norman Doidge introduced readers to neuroplasticity—the brain's ability to change its own structure and function in response to activity and mental experience. Now his revolutionary new book shows how the amazing process of neuroplastic healing really works. *The Brain's Way of Healing* describes natural, noninvasive avenues into the brain provided by the energy around us—in light, sound, vibration, and movement—that can awaken the brain's own healing capacities without producing unpleasant side effects. Doidge explores cases where patients alleviated chronic pain; recovered from

debilitating strokes, brain injuries, and learning disorders; overcame attention deficit and learning disorders; and found relief from symptoms of autism, multiple sclerosis, Parkinson's disease, and cerebral palsy. And we learn how to vastly reduce the risk of dementia, with simple approaches anyone can use. For centuries it was believed that the brain's complexity prevented recovery from damage or disease. The Brain's Way of Healing shows that this very sophistication is the source of a unique kind of healing. As he did so lucidly in *The Brain That Changes Itself*, Doidge uses stories to present cutting-edge science with practical real-world applications, and principles that everyone can apply to improve their brain's performance and health.

To Sell Is Human Jan 29 2020 Look out for Daniel Pink's new book, *When: The Scientific Secrets of Perfect Timing* #1 New York Times Business Bestseller #1 Wall Street Journal Business Bestseller #1 Washington Post bestseller From the bestselling author of *Drive* and *A Whole New Mind*, and teacher of the popular MasterClass on Sales and Persuasion, comes a surprising--and surprisingly useful--new book that explores the power of selling in our lives. According to the U.S. Bureau of Labor Statistics, one in nine Americans works in sales. Every day more than fifteen million people earn their keep by persuading someone else to make a purchase. But dig deeper and a startling truth emerges: Yes, one in nine Americans works in sales. But so do the other eight. Whether we're employees pitching colleagues on a new idea, entrepreneurs enticing funders to invest, or parents and teachers cajoling children to study, we spend our days trying to move others. Like it or not, we're all in sales now. *To Sell Is Human* offers a fresh look at the art and science of selling. As he did in *Drive* and *A Whole New Mind*, Daniel H. Pink draws on a rich trove of social science for his counterintuitive insights. He reveals the new ABCs of moving others (it's no longer "Always Be Closing"), explains why extraverts don't make the best salespeople, and shows how giving people an "off-ramp" for their actions can matter more than actually changing their minds. Along the way, Pink describes the six successors to the elevator pitch, the three rules for understanding another's perspective, the five frames that can make your message clearer and more persuasive, and much more. The result is a perceptive and practical book--one that will change how you see the world and transform what you do at work, at school, and at home.

Memory, Surprising New Insights Into how We Remember and why We Forget Jul 17 2021 An analysis of the many

dimensions of memory discusses how information is stored in the brain, how it is retrieved, why memory is an unreliable source for the "truth," and what factors drastically alter what people remember

Unbound Dec 10 2020 INSTANT NEW YORK TIMES BESTSELLER "Searing. Powerful. Needed." —Oprah "Sometimes a single story can change the world. Unbound is one of those stories. Tarana's words are a testimony to liberation and love." —Brené Brown From the founder and activist behind one of the largest movements of the twentieth and twenty-first centuries, the "me too" movement, Tarana Burke debuts a powerful memoir about her own journey to saying those two simple yet infinitely powerful words—me too—and how she brought empathy back to an entire generation in one of the largest cultural events in American history. Tarana didn't always have the courage to say "me too." As a child, she reeled from her sexual assault, believing she was responsible. Unable to confess what she thought of as her own sins for fear of shattering her family, her soul split in two. One side was the bright, intellectually curious third generation Bronxite steeped in Black literature and power, and the other was the bad, shame ridden girl who thought of herself as a vile rule breaker, not as a victim. She tucked one away, hidden behind a wall of pain and anger, which seemed to work...until it didn't. Tarana fought to reunite her fractured self, through organizing, pursuing justice, and finding community. In her debut memoir she shares her extensive work supporting and empowering Black and brown girls, and the devastating realization that to truly help these girls she needed to help that scared, ashamed child still in her soul. She needed to stop running and confront what had happened to her, for Heaven and Diamond and the countless other young Black women for whom she cared. They gave her the courage to embrace her power. A power which in turn she shared with the entire world. Through these young Black and brown women, Tarana found that we can only offer empathy to others if we first offer it to ourselves. Unbound is the story of an inimitable woman's inner strength and perseverance, all in pursuit of bringing healing to her community and the world around her, but it is also a story of possibility, of empathy, of power, and of the leader we all have inside ourselves. In sharing her path toward healing and saying "me too," Tarana reaches out a hand to help us all on our own journeys.

The Forever Dog Nov 20 2021 THE INSTANT #1 INTERNATIONAL BESTSELLER In this path-breaking guide, two of the world's most popular and trusted pet-care advocates reveal how to delay aging and provide a long, happy,

healthy life for our canine companions Like their human counterparts, dogs have been getting sicker and dying prematurely over the past few decades. Why? Scientists are beginning to understand that the chronic diseases afflicting humans—cancer, obesity, diabetes, organ degeneration and autoimmune disorders—also beset canines. As a result, our beloved companions struggle with preventable health problems throughout much of their lives. Because dogs can't make health and lifestyle decisions for themselves, it's up to pet parents to make smart, science-backed choices on their behalf. Rodney Habib and Karen Becker, DVM, travelled the world collecting wisdom from top geneticists, microbiologists and longevity researchers. They also interviewed people whose dogs have lived into their twenties and even thirties. The result is this unprecedented and comprehensive guide, filled with surprising information, invaluable advice and inspiring stories about dogs and the people who love them. The Forever Dog prescriptive plan can be tailored to the genetic predisposition of particular breeds or mixes. The authors discuss various types of food—including details commercial manufacturers don't want us to know—and offer recipes, tips and easy solutions for ensuring our dogs obtain the nutrients they need. They also explore how external factors that we often overlook can greatly affect a dog's overall health and well-being—including the role our own lifestyles and our vets' choices play. Indeed, the health equation works both ways and can travel "up the leash." This definitive dog-care guide empowers us with the knowledge we need to make wise choices and keep our dogs healthy and happy for years to come.

52 Ways to Walk Sep 06 2020 **52 Ways to Walk** is a short, user-friendly guide to attaining the full range of benefits that walking has to offer--physical, spiritual, and emotional--backed by the latest scientific research to inspire readers to develop a fulfilling walking lifestyle. We think we know how to walk. After all, walking is one of the very first skills we learn. But many of us are stuck in our walking routines, forever walking in the same place, in the same way, for the same time, with the same people. With its thought-provoking and evidence-backed weekly walk routine, **52 Ways to Walk** will encourage everyone to improve how they walk, while also encouraging them to seek out new locations (many on their own doorsteps), new walking companions (our brains age better when we mix up our fellow walkers), new times of the day and night, and new skills to acquire while walking. Inspirational, backed by science, illuminated with human anecdote, and bolstered with how-to tips, **52 Ways to Walk** will inspire,

challenge, support, and encourage everyone to become more ambitious with their walking practice, revealing how walking may be the best-kept secret of the supremely healthy and happy, the creative and well-slept--those with the best posture and sharpest memories. Just about everything, it appears, can be improved and enhanced by clever and judicious walking. It turns out you actually can get more from life, one step at a time.

Come as You are Sep 30 2022 An essential exploration of women's sexuality that will radically transform your sex life into one filled with confidence and joy. Researchers have spent the last decade trying to develop a 'pink pill' for women that would function like Viagra does for men.

Don't Believe a Word: The Surprising Truth About Language Jul 05 2020 A linguist's entertaining and highly informed guide to what languages are and how they function. Think you know language? Think again. There are languages that change when your mother-in-law is present. The language you speak could make you more prone to accidents. Swear words are produced in a special part of your brain. Over the past few decades, we have reached new frontiers of linguistic knowledge. Linguists can now explain how and why language changes, describe its structures, and map its activity in the brain. But despite these advances, much of what people believe about language is based on folklore, instinct, or hearsay. We imagine a word's origin is its "true" meaning, that foreign languages are full of "untranslatable" words, or that grammatical mistakes undermine English. In *Don't Believe A Word*, linguist David Shariatmadari takes us on a mind-boggling journey through the science of language, urging us to abandon our prejudices in a bid to uncover the (far more interesting) truth about what we do with words. Exploding nine widely held myths about language while introducing us to some of the fundamental insights of modern linguistics, Shariatmadari is an energetic guide to the beauty and quiriness of humanity's greatest achievement.

The Dorito Effect Jul 29 2022 A lively and important argument from an award-winning journalist proving that the key to reversing North America's health crisis lies in the overlooked link between nutrition and flavor. In *The Dorito Effect*, Mark Schatzker shows us how our approach to the nation's number one public health crisis has gotten it wrong. The epidemics of obesity, heart disease, and diabetes are not tied to the overabundance of fat or carbs or any other specific nutrient. Instead, we have been led astray by the growing divide between flavor—the tastes we crave—and the underlying nutrition. Since the late 1940s, we have been slowly leeching flavor out of the food we

grow. Those perfectly round, red tomatoes that grace our supermarket aisles today are mostly water, and the big breasted chickens on our dinner plates grow three times faster than they used to, leaving them dry and tasteless. Simultaneously, we have taken great leaps forward in technology, allowing us to produce in the lab the very flavors that are being lost on the farm. Thanks to this largely invisible epidemic, seemingly healthy food is becoming more like junk food: highly craveable but nutritionally empty. We have unknowingly interfered with an ancient chemical language—flavor—that evolved to guide our nutrition, not destroy it. With in-depth historical and scientific research, *The Dorito Effect* casts the food crisis in a fascinating new light, weaving an enthralling tale of how we got to this point and where we are headed. We've been telling ourselves that our addiction to flavor is the problem, but it is actually the solution. We are on the cusp of a new revolution in agriculture that will allow us to eat healthier and live longer by enjoying flavor the way nature intended.

Ageless Aug 06 2020 “A fascinating look at how scientists are working to help doctors treat the aging process itself, helping us all to lead longer, healthier lives.” —Sanjay Gupta, MD Aging—not cancer, not heart disease—is the underlying cause of most human death and suffering. The same cascade of biological changes that renders us wrinkled and gray also opens the door to dementia and disease. We work furiously to conquer each individual disease, but we never think to ask: Is aging itself necessary? Nature tells us it is not: there are tortoises and salamanders who are spry into old age and whose risk of dying is the same no matter how old they are, a phenomenon known as “biological immortality.” In *Ageless*, Andrew Steele charts the astounding progress science has made in recent years to secure the same for humans: to help us become old without getting frail, to live longer without ill health or disease.

The Art of Dying Well Oct 20 2021 This “comforting...thoughtful” (The Washington Post) guide to maintaining a high quality of life—from resilient old age to the first inklings of a serious illness to the final breath—by the New York Times bestselling author of *Knocking on Heaven's Door* is a “roadmap to the end that combines medical, practical, and spiritual guidance” (The Boston Globe). “A common sense path to define what a ‘good’ death looks like” (USA TODAY), *The Art of Dying Well* is about living as well as possible for as long as possible and adapting successfully to change. Packed with extraordinarily helpful insights and inspiring true stories, award-winning

journalist Katy Butler shows how to thrive in later life (even when coping with a chronic medical condition), how to get the best from our health system, and how to make your own “good death” more likely. Butler explains how to successfully age in place, why to pick a younger doctor and how to have an honest conversation with them, when not to call 911, and how to make your death a sacred rite of passage rather than a medical event. This handbook of preparations—practical, communal, physical, and spiritual—will help you make the most of your remaining time, be it decades, years, or months. Based on Butler’s experience caring for aging parents, and hundreds of interviews with people who have successfully navigated our fragmented health system and helped their loved ones have good deaths, *The Art of Dying Well* also draws on the expertise of national leaders in family medicine, palliative care, geriatrics, oncology, and hospice. This “empowering guide clearly outlines the steps necessary to prepare for a beautiful death without fear” (Shelf Awareness).

The One Minute Goddess Oct 08 2020 Book Description There is a hidden goddess in every woman, yet far too many find themselves in a state of CONFUSION, FRUSTRATION and EXHAUSTION. In today's world, she has exchanged her natural feminine energy that inspires and nurtures herself and others, to unhealthy control and independence. In this groundbreaking book, you will learn how to reclaim your inner goddess and allow the men in your life to provide the safety and security you want. There are only two things a man really wants and they are not what you think. This book will teach you how to give them what they want; and in return, you will have your deepest desires met effortlessly and without compromise. The One Minute Goddess offers practical, useable, simple methods of communication that will amaze you in their effectiveness. Just applying the seven-magic-words formula can change every relationship you have. This nugget alone is worth its weight in gold! About the author There are some men who have a life mission, but there are few who make it, to be in service to women. To the astonishment of women around the globe, there exists a man who does little else than create ways for women to have everything they want, including men that adore them. That man is Jean-Pierre LeBlanc. He specializes in success; personal success, successful relationships and successful businesses. He is a masterful alchemist who has turned his relationship, financial and health disasters into systems for extraordinary results. He now spends his time teaching others how to do the same. Experiencing the work of Jean-Pierre is transformational and life changing. He offers a roadmap and

unparalleled support to a place he calls enlightenedwealth., .a place worth going. His work is pure genius

Water Mar 01 2020 Spanning millennia and continents, here is a stunningly revealing history of how the distribution of water has shaped human civilization. Boccaletti, of The Nature Conservancy, “tackles the most important story of our time: our relationship with water in a world of looming scarcity” (Kelly McEvers, NPR Host). Writing with authority and brio, Giulio Boccaletti—honorary research associate at the Smith School of Enterprise and the Environment, University of Oxford—shrewdly combines environmental and social history, beginning with the earliest civilizations of sedentary farmers on the banks of the Nile, the Tigris, and the Euphrates Rivers. Even as he describes how these societies were made possible by sea-level changes from the last glacial melt, he incisively examines how this type of farming led to irrigation and multiple cropping, which, in turn, led to a population explosion and labor specialization. We see with clarity how irrigation’s structure informed social structure (inventions such as the calendar sprung from agricultural necessity); how in ancient Greece, the communal ownership of wells laid the groundwork for democracy; how the Greek and Roman experiences with water security resulted in systems of taxation; and how the modern world as we know it began with a legal framework for the development of water infrastructure. Extraordinary for its monumental scope and piercing insightfulness, *Water: A Biography* richly enlarges our understanding of our relationship to—and fundamental reliance on—the most elemental substance on earth.

Let the Lord Sort Them Sep 18 2021 NEW YORK TIMES EDITORS’ CHOICE • A deeply reported, searingly honest portrait of the death penalty in Texas—and what it tells us about crime and punishment in America “If you’re one of those people who despair that nothing changes, and dream that something can, this is a story of how it does.”—Anand Giridharadas, *The New York Times* Book Review WINNER OF THE J. ANTHONY LUKAS AWARD In 1972, the United States Supreme Court made a surprising ruling: the country’s death penalty system violated the Constitution. The backlash was swift, especially in Texas, where executions were considered part of the cultural fabric, and a dark history of lynching was masked by gauzy visions of a tough-on-crime frontier. When executions resumed, Texas quickly became the nationwide leader in carrying out the punishment. Then, amid a larger wave of criminal justice reform, came the death penalty’s decline, a trend so durable that even in Texas the

punishment appears again close to extinction. In *Let the Lord Sort Them*, Maurice Chammah charts the rise and fall of capital punishment through the eyes of those it touched. We meet Elsa Alcala, the orphaned daughter of a Mexican American family who found her calling as a prosecutor in the nation's death penalty capital, before becoming a judge on the state's highest court. We meet Danalynn Recer, a lawyer who became obsessively devoted to unearthing the life stories of men who committed terrible crimes, and fought for mercy in courtrooms across the state. We meet death row prisoners—many of them once-famous figures like Henry Lee Lucas, Gary Graham, and Karla Faye Tucker—along with their families and the families of their victims. And we meet the executioners, who struggle openly with what society has asked them to do. In tracing these interconnected lives against the rise of mass incarceration in Texas and the country as a whole, Chammah explores what the persistence of the death penalty tells us about forgiveness and retribution, fairness and justice, history and myth. Written with intimacy and grace, *Let the Lord Sort Them* is the definitive portrait of a particularly American institution.

Better Sex Through Mindfulness Dec 30 2019 A groundbreaking look at improving desire, arousal, and sexual satisfaction through mindfulness. Studies show that approximately half of all women experience some kind of sexual difficulty at one point in their lives, with lack of interest in sex being by far the most common--and the most distressing. And when sex suffers, so do all other areas of life. But it doesn't have to be that way. In *Better Sex through Mindfulness*, acclaimed psychologist and sex researcher Lori A. Brotto, offers a groundbreaking approach to improving desire, arousal, and satisfaction inside--and outside of--the bedroom. A pioneer in the use of mindfulness for treating sexual difficulties, Brotto has helped hundreds of women cultivate more exciting, fulfilling sexual experiences. In this accessible, relatable book, she explores the various reasons for sexual problems, such as stress and incessant multitasking, and tells the stories of many of the women she has treated over the years. She also provides easy, effective exercises that readers can do on their own to increase desire and sexual enjoyment, whether their goal is to overcome a sexual difficulty or simply give their love life a boost.

Health At Every Size Feb 21 2022 Fat isn't the problem. Dieting is the problem. A society that rejects anyone whose body shape or size doesn't match an impossible ideal is the problem. The Great Indoors Jun 15 2021 An Architectural Record Notable Book A fascinating, thought-provoking journey into our built environment Modern humans are an indoor species. We spend 90 percent of our time inside, shuttling between homes and offices, schools and stores, restaurants and gyms. And yet, in many ways, the indoor world remains unexplored territory. For all the time we spend inside buildings, we rarely stop to consider: How do these spaces affect our mental and physical well-being? Our thoughts, feelings, and behaviors? Our productivity, performance, and relationships? In this wide-ranging, character-driven book, science journalist Emily Anthes takes us on an adventure into the buildings in which we spend our days, exploring the profound, and sometimes unexpected, ways that they shape our lives. Drawing on cutting-edge research, she probes the pain-killing power of a well-placed window and examines how the right office layout can expand our social networks. She investigates how room temperature regulates our cognitive performance, how the microbes hiding in our homes influence our immune systems, and how cafeteria design affects what—and how much—we eat. Along the way, Anthes takes readers into an operating room designed to minimize medical errors, a school designed to boost students' physical fitness, and a prison designed to support inmates' psychological needs. And she previews the homes of the future, from the high-tech houses that could monitor our health to the 3D-printed structures that might allow us to live on the Moon. The Great Indoors provides a fresh perspective on our most familiar surroundings and a new understanding of the power of architecture and design. It's an argument for thoughtful interventions into the built environment and a story about how to build a better world—one room at a time.

The First 20 Minutes Nov 08 2020 The New York Times bestseller that explains how groundbreaking scientific discoveries can help each of us achieve our personal best Every week, Gretchen Reynolds single-handedly

influences how millions of Americans work out. In her popular New York Times column, she debunks myths, spurs conversation, and stirs controversy by questioning widely held beliefs about exercise. Here, Reynolds consults experts in a range of fields to share paradigm-shifting findings that were previously only available in academic and medical journals, including:

- 20 minutes of cardio is all you need (and sometimes six minutes is enough)
- Stretching before a workout is counterproductive
- Chocolate milk is better than Gatorade for recovery

Whether you're running ultramarathons or just want to climb the stairs without losing your breath, *The First 20 Minutes* will show you how to be healthy today and perform better tomorrow.

Redirect Jun 27 2022 "There are few academics who write with as much grace and wisdom as Timothy Wilson. REDIRECT is a masterpiece." -Malcolm Gladwell What if there were a magic pill that could make you happier, turn you into a better parent, solve a number of your teenager's behavior problems, reduce racial prejudice, and close the achievement gap in education? There is no such pill, but story editing - the scientifically based approach described in REDIRECT - can accomplish all of this. The world-renowned psychologist Timothy Wilson shows us how to redirect the stories we tell about ourselves and the world around us, with subtle prompts, in ways that lead to lasting change. Fascinating, groundbreaking, and practical, REDIRECT demonstrates the remarkable power small changes can have on the ways we see ourselves and our environment, and how we can use this in our everyday lives.

The Third Wave Jun 03 2020 Steve Case, co-founder of America Online (AOL) and one of America's most accomplished entrepreneurs, shares a roadmap for how anyone can succeed in a world of rapidly changing technology. We are entering, he explains, a new paradigm called the "Third Wave" of the Internet. The first wave saw AOL and other companies lay the foundation for consumers to connect to the Internet. The second wave saw companies like Google and Facebook build on top of the Internet to create search and social networking capabilities, while apps like Snapchat and Instagram leverage the smartphone revolution. Now, Case argues, we're entering the Third Wave: a period in which entrepreneurs will vastly transform major "real world" sectors like health, education, transportation, energy, and food-and in the process change the way we live our daily lives.

Burnout Jan 23 2022 NEW YORK TIMES BESTSELLER • "This book is a gift! I've been practicing their strategies, and it's a total game-changer."—Brené Brown, PhD, author of the #1 New York Times bestseller *Dare to*

Lead This groundbreaking book explains why women experience burnout differently than men—and provides a simple, science-based plan to help women minimize stress, manage emotions, and live a more joyful life. Burnout. Many women in America have experienced it. What’s expected of women and what it’s really like to be a woman in today’s world are two very different things—and women exhaust themselves trying to close the gap between them. How can you “love your body” when every magazine cover has ten diet tips for becoming “your best self”? How do you “lean in” at work when you’re already operating at 110 percent and aren’t recognized for it? How can you live happily and healthily in a sexist world that is constantly telling you you’re too fat, too needy, too noisy, and too selfish? Sisters Emily Nagoski, PhD, and Amelia Nagoski, DMA, are here to help end the cycle of feeling overwhelmed and exhausted. Instead of asking us to ignore the very real obstacles and societal pressures that stand between women and well-being, they explain with compassion and optimism what we’re up against—and show us how to fight back. In these pages you’ll learn • what you can do to complete the biological stress cycle—and return your body to a state of relaxation • how to manage the “monitor” in your brain that regulates the emotion of frustration • how the Bikini Industrial Complex makes it difficult for women to love their bodies—and how to defend yourself against it • why rest, human connection, and befriending your inner critic are keys to recovering and preventing burnout With the help of eye-opening science, prescriptive advice, and helpful worksheets and exercises, all women will find something transformative in these pages—and will be empowered to create positive change. Emily and Amelia aren’t here to preach the broad platitudes of expensive self-care or insist that we strive for the impossible goal of “having it all.” Instead, they tell us that we are enough, just as we are—and that wellness, true wellness, is within our reach. NAMED ONE OF THE BEST BOOKS OF THE YEAR BY BOOKRIOT “Burnout is the gold standard of self-help books, delivering cutting-edge science with energy, empathy, and wit. The authors know exactly what’s going on inside your frazzled brain and body, and exactly what you can do to fix it. . . . Truly life-changing.”—Sarah Knight, New York Times bestselling author of *Calm the F*ck Down*

In Praise of Walking Oct 27 2019

A New Day Aug 25 2019 This big-hearted story of kindness—reminiscent of *The Day the Crayons Quit*—is written by the bestselling author of *Ordinary People Change the World* and illustrated by the Caldecott Medal-winning

creator of Beekle. Sunday quit, just like that. She said she was tired of being a day. And so the other days of the week had no choice but to advertise: "WANTED: A NEW DAY. Must be relaxing, tranquil, and replenishing. Serious inquires only." Soon lots of hopefuls arrived with their suggestions, such as Funday, Bunday, Acrobaturday, SuperheroDay, and even MonstersWhoResembleJellyfishDay! Things quickly got out of hand . . . until one more candidate showed up: a little girl with a thank-you gift for Sunday. The girl suggested simply a nice day--a day to be kind. And her gratitude made a calendar's worth of difference to Sunday, who decided she didn't need to quit after all. When we appreciate each other a little bit more, all the days of the week can be brand-new days where everything is possible.

Experimentation Works Jan 11 2021 Don't fly blind. See how the power of experiments works for you. When it comes to improving customer experiences, trying out new business models, or developing new products, even the most experienced managers often get it wrong. They discover that intuition, experience, and big data alone don't work. What does? Running disciplined business experiments. And what if companies roll out new products or introduce new customer experiences without running these experiments? They fly blind. That's what Harvard Business School professor Stefan Thomke shows in this rigorously researched and eye-opening book. It guides you through best practices in business experimentation, illustrates how these practices work at leading companies, and answers some fundamental questions: What makes a good experiment? How do you test in online and brick-and-mortar businesses? In B2B and B2C? How do you build an experimentation culture? Also, best practice means running many experiments. Indeed, some hugely successful companies, such as Amazon, Booking.com, and Microsoft, run tens of thousands of controlled experiments annually, engaging millions of users. Thomke shows us how these and many other organizations prove that experimentation provides significant competitive advantage. How can managers create this capability at their own companies? Essential is developing an experimentation organization that prizes the science of testing and puts the discipline of experimentation at the center of its innovation process. While it once took companies years to develop the tools for such large-scale experiments, advances in technology have put these tools at the fingertips of almost any business professional. By combining the power of software and the rigor of controlled experiments, today's managers can make better decisions, create

magical customer experiences, and generate big financial returns. *Experimentation Works* is your guidebook to a truly new way of thinking and innovating.

More from Less Apr 13 2021 From the coauthor of the New York Times bestseller *The Second Machine Age*, a paradigm-shifting argument “full of fascinating information and provocative insights” (Publishers Weekly, starred review)—demonstrating that we are increasing prosperity while using fewer natural resources. Throughout history, the only way for humanity to grow was by degrading the Earth: chopping down forests, polluting the air and water, and endlessly using up resources. Since the first Earth Day in 1970, the focus has been on radically changing course: reducing our consumption, tightening our belts, and learning to share and reuse. Is that argument correct? Absolutely not. In *More from Less*, McAfee argues that to solve our ecological problems we should do the opposite of what a decade of conventional wisdom suggests. Rather than reduce and conserve, we should rely on the cost-consciousness built into capitalism and the streamlining miracles of technology to create a more efficient world. America—a large, high-tech country that accounts for about 25% of the global economy—is now generally using less of most resources year after year, even as its economy and population continue to grow. What’s more, the US is polluting the air and water less, emitting fewer greenhouse gases, and replenishing endangered animal populations. And, as McAfee shows, America is not alone. Other countries are also transforming themselves in fundamental ways. What has made this turnabout possible? One thing, primarily: the collaboration between technology and capitalism, although good governance and public awareness have also been critical. McAfee does warn of issues that haven’t been solved, like global warming, overfishing, and communities left behind as capitalism and tech progress race forward. But overall, *More from Less* is a revelatory and “deeply engaging” (Booklist) account of how we’ve stumbled into an unexpectedly better balance with nature—one that holds out the promise of more abundant and greener centuries ahead.

The Come as You Are Workbook May 27 2022 A new, practical workbook from the New York Times bestselling author of *Come As You Are* that allows you to apply the book’s groundbreaking research and understanding of why and how women’s sexuality works to everyday life. In the twentieth century, women’s sexuality was seen as “Men’s Sexuality Lite”: basically the same, but not quite as good. From genital response to sexual desire to orgasm, we just

couldn't understand that complicated, inconsistent, crazy-making "lady business." That is, until Emily Nagoski changed the game with her New York Times bestseller, *Come As You Are*. Using groundbreaking science and research, she proved that the most important factor in creating and sustaining a sex life filled with confidence and joy is not what the parts are or how they're organized, but how you feel about them. Which means that things like stress, mood, trust, and body image are not peripheral factors in a woman's sexual wellbeing; they are central to it. And, that even if you don't yet feel that way, you are already sexually whole. Nagoski's book changed countless women's lives and approaches to sex, and now she offers the next step. The *Come As You Are Workbook* is a practical companion to this bestselling guide, filled with new activities, prompts, and thought-provoking examples to help you exercise and expand on the knowledge you've learned. This collection of worksheets, journaling prompts, illustrations, and diagrams is a practical and engaging companion for anyone who wants to further their understanding of their own bodies and sex lives.

Drop Acid Mar 25 2022 *** NEW YORK TIMES BESTSELLER *** What do obesity, insulin resistance, diabetes, fatty liver disease, hypertension, cardiovascular disease, stroke, neurological disorders and premature death have in common? All can be stoked by high uric acid levels. Our most respected scientific literature is bursting with evidence that elevated uric acid levels lie at the root of many pervasive health conditions, but mainstream medicine for the most part remains unaware of this connection. This is especially alarming because many people don't know they are suffering from sky-high levels, putting them at risk for developing or exacerbating potentially life-threatening illnesses. Offering an engaging blend of science and practical advice, *Drop Acid* exposes the deadly truth about uric acid and teaches invaluable strategies to manage its levels, including: - Simple dietary edits focused on reducing fructose and foods high in 'purines' that can raise uric acid. - Natural hacks that lower levels such as consuming tart cherries, vitamin C, quercetin, and coffee. - Identifying common pharmaceuticals that threaten to increase uric acid. - Lifestyle interventions, like restorative sleep and exercise. - How to easily test your uric acid levels at home - a test routinely performed in your doctor's office during regular check-ups but typically ignored. Featuring the ground-breaking 'LUV' (Lower Uric Values) diet, 35 delicious recipes, self-assessment quizzes and a 21 day program for dropping levels, *Drop Acid* empowers readers with the information they need to address this

hidden danger and live longer, leaner and healthier lives.

How We Learn May 15 2021 In the tradition of *The Power of Habit* and *Thinking, Fast and Slow* comes a practical, playful, and endlessly fascinating guide to what we really know about learning and memory today—and how we can apply it to our own lives. From an early age, it is drilled into our heads: Restlessness, distraction, and ignorance are the enemies of success. We're told that learning is all self-discipline, that we must confine ourselves to designated study areas, turn off the music, and maintain a strict ritual if we want to ace that test, memorize that presentation, or nail that piano recital. But what if almost everything we were told about learning is wrong? And what if there was a way to achieve more with less effort? In *How We Learn*, award-winning science reporter Benedict Carey sifts through decades of education research and landmark studies to uncover the truth about how our brains absorb and retain information. What he discovers is that, from the moment we are born, we are all learning quickly, efficiently, and automatically; but in our zeal to systematize the process we have ignored valuable, naturally enjoyable learning tools like forgetting, sleeping, and daydreaming. Is a dedicated desk in a quiet room really the best way to study? Can altering your routine improve your recall? Are there times when distraction is good? Is repetition necessary? Carey's search for answers to these questions yields a wealth of strategies that make learning more a part of our everyday lives—and less of a chore. By road testing many of the counterintuitive techniques described in this book, Carey shows how we can flex the neural muscles that make deep learning possible. Along the way he reveals why teachers should give final exams on the first day of class, why it's wise to interleave subjects and concepts when learning any new skill, and when it's smarter to stay up late prepping for that presentation than to rise early for one last cram session. And if this requires some suspension of disbelief, that's because the research defies what we've been told, throughout our lives, about how best to learn. The brain is not like a muscle, at least not in any straightforward sense. It is something else altogether, sensitive to mood, to timing, to circadian rhythms, as well as to location and environment. It doesn't take orders well, to put it mildly. If the brain is a learning machine, then it is an eccentric one. In *How We Learn*, Benedict Carey shows us how to exploit its quirks to our advantage.
