Students of the Bible in 4th and 5th Century Syria Jan 27 2022 A number of prolific writers were active in the Syrian Church of the 4th and 5th centuries. However, in some cases these writers are only accessible by virtue of sidelights thrown e.g. from Armenian and Latin translations (as is the case with "Eusebius of Emesa"); or, their works may be hidden under false attributions in Greek manuscripts (eg in: "Pseudo-Chrysostomica" - in fact belonging to "Severian of Gabala"); or, their relationship to the Syriac language and culture may be misrepresented in modern research (as for "Theodoret of Cyrhus"). Since the 1960s Henning Lehmann's research.

Tibetan Yoga of Movement Feb 25 2022 Tibetan Yoga of Movement introduces the method of Yantra Yoga, a traditional Tibetan form that is one of the oldest recorded systems of yoga in the world. Derived from an eighth-century Tibetan Buddhist text, Yantra Yoga includes many positions similar to those of Hatha Yoga in form, but different in the dynamics of the way in which they are practiced, especially in the coordination of movement and breathing. The Yantra Yoga system encompasses 108 sets of movements (yantras) and several types of breathing to be learned at your own pace. Due to its emphasis on uniting breathing and movement, Yantra Yoga can deepen the experience of yoga practitioners from any tradition and profoundly benefit anyone seeking authentic balance, harmony, and the understanding of our true nature. Since the eighth century, this yoga teaching has been passed down from teacher to student in an unbroken lineage. Chögyal Namkhai Norbu, the current lineage holder, began transmitting Yantra Yoga in the West in the 1970s. Presenting detailed instructions accompanied by over 400 instructional photos, the book describes the sequences of movements, methods of breathing, and the concrete health benefits of the practice. From the Trade Paperback edition.

The Composition of Tender is the Night Oct 24 2021 Working with the complete collection of Tender is the Night manuscripts in the Princeton University Library, Matthew J. Bruccoli reconstructs seventeen drafts and three versions of the novel to answer questions about F. Scott Fitzgerald's major work that have long puzzled critics of modern literature. In 1934, nine years after the appearance of The Great Gatsby, Fitzgerald permitted publication of Tender is the Night. Disappointed by its critical reception, Fitzgerald suggested that the structure of the novel should be drastically rearranged. In 1951, eleven years after his death, Charles Scribner's Sons brought out an edition that incorporated Fitzgerald's changes. Controversy arose over the merits of the two published versions and over the "nine lost years" in Fitzgerald's life between his two great novels, years of rewriting before publication of Tender is the Night that resulted in six cartons of notes and drafts. After analyzing this wealth of material, Bruccoli reconstructs every working stage in the novel and reaches his own conclusions about which edition is the most valid.

Internet and Smartphone Use-Related Addiction Health Problems Sep 10 2020 This Special Issue presents some of the main emerging research on technological topics of health and education approaches to Internet use-related problems, before and during the beginning of coronavirus disease 2019 (COVID-19). The objective is to provide an overview to facilitate a comprehensive and practical approach to these new trends to promote research, interventions, education, and prevention. It contains 40 papers, four reviews and thirty-five empirical papers and an editorial introducing everything in a rapid review format. Overall, the empirical ones are of a relational type, associating specific behavioral addictive problems with individual factors, and a few with contextual factors, generally in adult populations. Many have adapted scales to measure these problems, and a few cover experiments and mixed methods studies. The reviews tend to be about the concepts and measures of these problems, intervention options, and prevention. In summary, it seems that these are a global culture trend impacting health and educational domains. Internet use-related addiction problems have emerged in almost all societies, and strategies to cope with them are under development to offer solutions to these contemporary challenges, especially during the pandemic situation that has highlighted the global health problems that we have, and how to holistically tackle them.

THE GOOD NEWS OF JESUS CHRIST, THE SON OF DAVID AND ABRAHAM, ACCORDING TO MATTHEW Sep 03 2022 The practical commentary on Matthew's Gospel is written for pastoral co-workers and for the faithful. It is a solid help for a better, deeper and profounder understanding of biblical teaching and it will help to preach the Good News more convincingly always and everywhere. The conception of this commentary follows the principle of "Lectio Divina" in five steps (cf. Pope Benedict XVI, Verbum Domini. The Word of the Lord, no. 87): to read the "Word of God", meditate/reflect on it, pray with it and internalize it, as well as live out the biblical message. In doing so, the Christian lifestyle will be inspired biblically. Der praxisorientierte Kommentar zum Matthäusevangelium bietet Seelsorgern und engagierten Laien eine solide Handreichung für ein besseres, vertieftes Schriftverständnis und für eine glaubwürdige Verkündigung im Hier und Heute - in der Liturgie, Schule ... oder privat zu Hause. Der Aufbau des Kommentars folgt dem Prinzip der "Lectio Divina" (vgl. Papst Benedikt XVI., Verbum Domini, Nr. 87) oder in den Worten von Papst Franziskus ausgedrückt: "contemplativa in actione". So stützt die Abfolge von Lektüre, Meditation, Gebet und Verinnerlichung die Motivation, zu wirklich alltagsverändernden Handlungsweisen zu finden. Auf diese Weise wird "die Verkündigung des Evangeliums einfacher, tief und ausstrahlend" (Papst Franziskus am 25. September 2013).

Principles of Animal Behavior, 4th Edition May 31 2022 Since the last edition of this definitive textbook was published in 2013, much has happened in the field of animal behavior. In this fourth edition, Lee Alan Dugatkin draws on cutting-edge new work not only to update and expand on the studies presented, but also to reinforce the previous editions' focus on ultimate and proximate causation, as well as the book's unique emphasis on natural selection, learning, and cultural transmission. The result is a state-of-the-art textbook on animal behavior that explains underlying concepts in a way that is both scientifically rigorous and accessible to students. Each chapter in the book provides a sound theoretical and conceptual basis upon which the empirical studies rest. A completely new feature in this edition are the Cognitive Connection boxes in Chapters 2–17, designed to dig deep into the importance of the cognitive underpinnings to many types of behaviors. Each box focuses on a specific issue related to cognition and the particular topic covered in that chapter. As Principles of Animal Behavior makes clear, the tapestry of animal behavior is created from weaving all of these components into a beautiful whole. With Dugatkin's exquisitely illustrated, comprehensive, and up-to-date fourth edition, we are able to admire that beauty anew.

World Scientific Reference On Contingent Claims Analysis In Corporate Finance (In 4 Volumes) Nov 24 2021 Black and Scholes (1973) and Merton (1973, 1974) (hereafter referred to as BSM) introduced the contingent claim approach (CCA) to the valuation of corporate debt and equity. The BSM modeling framework is also named the 'structural' approach to risky debt valuation. The CCA considers all stakeholders of the corporation as holding contingent claims on the assets of the corporation. Each claim holder has different priorities, maturities and conditions for payouts. It is based on the principle that all the assets belong to all the liability holders. The BSM modeling framework gives the basic fundamental version of the structural model where default is assumed to occur when the net asset value of the firm at the maturity of the pure-discount debt becomes negative, i.e., market value of the assets of the firm falls below the face value of the firm's liabilities. In a regime of limited liability, the shareholders of the firm have the option to default on the firm's debt. Equity can be viewed as a European call option on the firm's assets with a strike price equal to the face value of the firm's debt. Actually, CCA can be used to value all the components of the firm's liabilities, equity, warrants, debt, contingent convertible debt, guarantees, etc. In the four volumes we present the major academic research on CCA in corporate finance starting from 1973, with seminal papers of Black and Scholes (1973) and Merton (1973, 1974). Volume I covers the foundation of CCA and contributions on equity valuation. Volume II focuses on corporate debt valuation and the capital structure of the firm. Volume III presents empirical evidence on the valuation of debt instruments as well as applications of the CCA to various financial arrangements. The papers in Volume IV show how to apply the CCA to analyze sovereign credit risk, contingent convertible bonds (CoCos), deposit insurance and loan guarantees. Volume 1: Foundations of CCA and Equity Valuation Volume 1 presents the seminal papers of Black and Scholes (1973) and Merton (1973, 1974). This volume also includes papers that specifically price equity as a call option on the corporation. It introduces warrants, convertible bonds and taxation as contingent claims on the corporation. It highlights the strong relationship between the CCA and the Modigliani-Miller (M&M) Theorems, and the relation to the Capital Assets Pricing Model (CAPM). Volume 2: Corporate Debt Valuation with CCA Volume 2 concentrates on corporate bond valuation by introducing various types of bonds with different covenants as well as introducing various conditions that trigger default. While empirical evidence indicates that the simple Merton's model underestimates the credit spreads, additional risk factors like jumps can be used to resolve it. Volume 3: Empirical Testing and Applications of CCA Volume 3 includes papers that look at issues in corporate finance that can be explained with the CCA approach. These issues include the effect of dividend policy on the valuation of debt and equity, the pricing of employee stock options and many other issues of corporate governance. Volume 4: Contingent Claims Approach for Banks and Sovereign Debt Volume 4 focuses on the application of the contingent claim approach to banks and other financial intermediaries. Regulation of the banking industry led to the creation of new financial securities (e.g., CoCos) and new types of stakeholders (e.g., deposit insurers).

Late Classical Pottery from Ancient Corinth May 19 2021 In 1971, in the southwestern area of the Roman Forum of Corinth, a round-bottomed drainage channel was discovered filled with the largest deposit of pottery of the 4th century ever found in the city, as well as some coins, terracotta figurines, and metal and stone objects. This volume publishes the pottery and metal and stone objects, and includes a re-examination of the coins by Orestes Zervos. Some of the cooking ware has been subjected to neutron activation analysis, and a statistical analysis of all recovered pottery has been completed. The contents of Drain 1971-1 are important for the function of the Classical buildings in this part of Corinth, especially Buildings I and II, and for the chronology of the renovation program that included the construction of the South Stoa, which was probably not built before the last decade of the 4th century.
