**From Pariahs to Partners Jan 28 2020** In the early 1990s 50,000 children were in New York City's foster care system. By 2011 there were fewer than 15,000. In his book, David Tobis shows how such radical change was driven largely by a movement of mothers whose children had been placed into foster care, who fought to become advocates and stakeholders in a system that had previously viewed them as part of the problem. This book serves as an example of how advocates can change a system, as told from the perspective of key figures, change agents, and the parent advocates themselves.

*Hold On to Your Kids* Dec 09 2020 A psychologist with a reputation for penetrating to the heart of complex parenting issues joins forces with a physician and bestselling author to tackle one of the most disturbing and misunderstood trends of our time -- peers replacing parents in the lives of our children. Dr. Neufeld has dubbed this phenomenon peer orientation, which refers to the tendency of children and youth to look to their peers for direction: for a sense of right and wrong, for values, identity and codes of behaviour. But peer orientation undermines family cohesion, poisons the school atmosphere, and fosters an aggressively hostile and sexualized youth culture. It provides a powerful explanation for schoolyard bullying and youth violence; its effects are painfully evident in the context of teenage gangs and criminal activity, in tragedies such as in Littleton, Colorado; Tabor, Alberta and Victoria, B.C. It is an escalating trend that has never been adequately described or contested until *Hold On to Your Kids*. Once understood, it becomes self-evident -- as do the solutions. *Hold On to Your Kids* will restore parenting to its natural intuitive basis and the parent-child relationship to its rightful preeminence. The concepts, principles and practical advice contained in *Hold On to Your Kids* will empower parents to satisfy their children's inborn need to find direction by turning towards a source of authority, contact and warmth. Something has changed. One can sense it, one can feel it, just not find the words for it. Children are not quite the same as we remember being. They seem less likely to take their cues from adults, less inclined to please those in charge, less afraid of getting into trouble. Parenting, too, seems to have changed. Our parents seemed more confident, more certain of themselves and had more impact on us, for better or for worse. For many, parenting does not feel natural. Adults through the ages have complained about children being less respectful of their elders and more difficult to manage than preceding generations, but could it be that this time it is for real? -- from *Hold On to Your Kids*

*Parental Monitoring of Adolescents* Aug 17 2021 "The goals of this book are to deepen understanding of the concept and measurement of parental monitoring and to compile, review, and extend what is known about the topic. It is particularly effective in identifying weaknesses in current conceptualizations and methods used to study parental monitoring."---Todd Herrenkohl, University of Washington School of Social Work The close supervision of adolescents dramatically reduces the incidence of risky sexual behavior, drug and alcohol use, and other activities that could negatively affect one's health and well-being. Because of the strong correlation between parental monitoring and a child's welfare, social workers, psychologists, child development specialists, and other professionals who work with children now incorporate monitoring into their programs and practice. A definitive resource providing the best research and techniques for productive

supervision within the home, this volume defines and develops the conceptual, methodological, and practical areas of parental monitoring and monitoring research, locating the right balance of closeness and supervision while also remaining sensitive to ethnic and socioeconomic backgrounds. Assembled by leading experts on childrearing and healthy parent-child communication, *Parental Monitoring of Adolescents* identifies the conditions that best facilitate parental knowledge, ideal interventions for high-risk youth, and the factors that either help or hinder the monitoring of an adolescent's world. The volume also sets a course for future research, establishing a new framework that evaluates the nature and approach of monitoring within the parent-adolescent relationship and the particular social realities of everyday life.

**What Makes a Difference** Jul 04 2020 A randomized trial evaluated the efficacy of 17 Early Head Start (EHS) programs. 3,001 low-income families with a pregnant woman or an infant under 12 months were assigned to a treatment or control group. Data were collected when children were 1, 2, 3, and 5 years old. Analyses examined (1) impacts at ages 2 and 3 (while services were being offered) and at age 5, and (2) contributions of early education experiences across children's first 5 years of life. Child outcomes included cognition, language, attention, behavior problems, and health; maternal outcomes included parenting, mental health, and employment

**Transforming the Workforce for Children Birth Through Age 8** Mar 24 2022 Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. *Transforming the Workforce for Children Birth Through Age 8* explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. *Transforming the Workforce for Children Birth Through Age 8* offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.

**Handbook of Parenting** Oct 07 2020 Despite the fact that most people become parents and everyone who has ever lived has had parents, parenting remains a mystifying subject about which almost everyone has opinions, but about which few people agree. Striking permutations on the theme of parenting are emerging--single parenthood, blended families, lesbian and gay parents, and teen versus fifties first-time moms and dads. Divided into four volumes, the *Handbook of Parenting* is concerned with different types of parents, basic characteristics of parenting, forces that shape parenting, problems faced by parents, and the practical sides of parenting. Contributors have worked in different ways toward understanding all of these diverse aspects of parenting and look to the most recent research and thinking in the field to shed light on many topics every parent has wondered about. Because development is too subtle, dynamic, and intricate to admit that parental caregiving alone determines the course and outcome of ontogeny, volume 1 concerns how children influence parenting. Volume 2 relates parenting to its biological roots and sets parenting in its ecological framework. Volume 3 distinguishes among the cast of characters responsible for parenting and is revealing of the psychological make-ups and social interests of those individuals. Volume 4 describes problems of parenting as well as the promotion of positive parenting practices. Written to be read and absorbed in a single sitting, each chapter addresses a different but central topic in parenting, and is rooted in current thinking and theory as well as classic and modern research on that topic. All chapters follow a standard organization including an introduction to the chapter as a whole followed by historical considerations of the topic, a discussion of central issues and theory, a review of classic and modern research, forecasts of future directions for theory and research, and a conclusion. In addition to considering their own convictions and research, the chapter contributors present and broadly interpret all major points of view and central lines of inquiry.

**The Cult of Smart** Mar 31 2020 Named one of *Vulture's* Top 10 Best Books of 2020! Leftist firebrand Fredrik deBoer exposes the lie at the heart of our educational system and demands top-to-bottom reform. Everyone agrees that education is the key to creating a more just and equal world, and that our schools are broken and failing. Proposed reforms variously target incompetent teachers, corrupt union practices, or outdated curricula, but no one acknowledges a scientifically-proven fact that we all understand intuitively: Academic potential varies between individuals, and cannot be dramatically improved. In *The Cult of Smart*, educator and outspoken leftist Fredrik deBoer exposes this omission as the central flaw of our entire society, which has created and perpetuated an unjust class structure based on intellectual ability. Since cognitive talent varies from person to person, our education system can never create equal opportunity for all. Instead, it teaches our children that hierarchy and competition are natural, and that human value should be based on intelligence. These ideas are counter to

everything that the left believes, but until they acknowledge the existence of individual cognitive differences, progressives remain complicit in keeping the status quo in place. This passionate, voice-driven manifesto demands that we embrace a new goal for education: equality of outcomes. We must create a world that has a place for everyone, not just the academically talented. But we'll never achieve this dream until the Cult of Smart is destroyed.

**The Process of Parenting** Oct 31 2022 *The Process of Parenting* describes the many ways parents and caregivers can translate their love for children into effective parenting behavior. The book has strong emphasis on the development process in terms of children's and parents' growth as complex individuals, and in the changing nature of their relationships over time. Because parents and children are distinct individuals, the book includes a problem-solving approach that can help parents arrive at solutions that fit them, their children, and their life circumstances. The ninth edition includes new first person narrative boxes and more emphasis on social context, new evidence-based parenting programs, and international parenting.

**Parenting by Design** May 14 2021 Raising children is no easy task. No matter the child, no matter the situation, every parent longs for obedience from their offspring. God isn't overbearing when He deals with us, and His example is perfect. There's no question that kids want truth and love, as well as bonding and boundaries. Because God understands the human condition, He knows we learn best from hands-on experience, Jesus' example, and the Holy Spirit's empathetic examination of our hearts. We're asking you to consider using the same parenting style with your children. *Parenting by Design* offers a more relational approach to raising children, relying less on rote obedience and more on walking with your children through their decision-making development. Forcing children to obey rarely works to build a healthy relationship that allows you to enter into their worlds and understand their decisions. This book will help you parent with grace and love, two key elements in motivating a child to obey.

**Bereavement** Jan 10 2021 "The book is well organized, well detailed, well referenced; it is an invaluable sourcebook for researchers and clinicians working in the area of bereavement. For those with limited knowledge about bereavement, this volume provides an excellent introduction to the field and should be of use to students as well as to professionals," states *Contemporary Psychology*. The *Lancet* comments that this book "makes good and compelling reading....It was mandated to address three questions: what is known about the health consequences of bereavement; what further research would be important and promising; and whether there are preventive interventions that should either be widely adopted or further tested to evaluate their efficacy. The writers have fulfilled this mandate well."

**The Nurture Assumption** Oct 19 2021 Argues that children's development is influenced primarily by their peers--other children--rather than by their parents

**Transforming Early Head Start Home Visiting** Feb 20 2022 Research on home visiting shows that Early Head Start (EHS) home-based programs benefit from additional training and resources that streamline philosophy and content. In this essential guide, Walsh and Mortensen propose that alignment with Family Life Education's (FLE) strengths-based methodology results in greater consistency through a model of prevention, education, and collaboration with families. This text is the first to outline linkages between FLE and EHS home visiting. It explores a qualitative study of FLE integrated in a current EHS home-based program and application of FLE methodology to home visiting topics. This approach will influence professional practice and provide a foundation for developing evidence-based home visiting practices.

Online content accompanies the text, with videos demonstrating the FLE approach in action and discussion questions to encourage engagement with and understanding of the core material. *Transforming Early Head Start Home Visiting: A Family Life Education Approach* is essential reading for upper-level undergraduate and masters students in family studies and early childhood education, as well as practitioners working with children and families.
