A History of Cornell Dec 26 2021 Cornell University is fortunate to have as its historian a man of Morris Bishop's talents and devotion. As an accurate record and a work of art possessing form and personality, his book at once conveys the unique character of the early university—reflected in its vigorous founder, its first scholarly president, a brilliant and eccentric faculty, the hardy student body, and, sometimes unfortunately, its early architecture—and establishes Cornell's wider significance as a case history in the development of higher education. Cornell began in rebellion against the obscurantism of college education a century ago. Its record, claims the author, makes a social and cultural history of modern America. This story will undoubtedly entrance Cornellians; it will also charm a wider public. Dr. Allan Nevins, historian, wrote: "I anticipated that this book would meet the sternest tests of scholarship, insight, and literary finish. I find that it not only does this, but that it has other high merits. It shows grasp of ideas and forces. It is graphic in its presentation of character and idiosyncrasy. It lights up its story by a delightful play of humor, felicitously expressed. Its emphasis on fundamentals, without pomposity or platitude, is refreshing. Perhaps most important of all, it achieves one goal that in the history of a living university is both extremely difficult and extremely valuable: it recreates the changing atmosphere of time and place. It is written, very plainly, by a man who has known and loved Cornell and Ithaca for a long time, who has steeped himself in the traditions and spirit of the institution, and who possesses the enthusiasm and skill to convey his understanding of these intangibles to the reader." The distinct personalities of Ezra Cornell and first president Andrew Dickson White dominate the early chapters. For a vignette of the founder, see Bishop's description of "his" first buildings (Cascadilla, Morrill, McGraw, White, Sibley): "At best," he writes, "they embody the character of Ezra Cornell, grim, gray, sturdy, and economical." To the English historian, James Anthony Froude, Mr. Cornell was "the most surprising and venerable object I have seen in America." The first faculty, chosen by President White, reflected his character: "his idealism, his faith in social emancipation by education, his dislike of dogmatism, confinement, and inherited orthodoxy"; while the "romantic upstate gothic" architecture of such buildings as the President's house (now Andrew D. White Center for the Humanities), Sage Chapel, and Franklin Hall may be said to "portray the taste and Soul of Andrew Dickson White." Other memorable characters are Louis Fuertes, the beloved naturalist; his student, Hugh Troy, who once borrowed Fuertes' rhinoceros-foot wastebasket for illicit if hilarious purposes; the more noteworthy and the more eccentric among the faculty of succeeding presidential eras; and of course Napoleon, the campus dog, whose talent for hailing streetcars brought him home safely—and alone—from the Penn game. The humor in *A History of Cornell* is at times kindly, at times caustic, and always illuminating.

The Next 500 Years Jun 27 2019 An argument that we have a moral duty to explore other planets and solar systems--because human life on Earth has an expiration date. Inevitably, life on Earth will come to an end, whether by climate disaster, cataclysmic war, or the death of the sun in a few billion years. To avoid extinction, we will have to find a new home planet, perhaps even a new solar system, to inhabit. In this provocative and fascinating book, Christopher Mason argues that we have a moral duty to do just that. As the only species aware that life on Earth has an expiration date, we have a responsibility to act as the shepherd of life-forms--not only for our species but for all species on which we depend and for those still to come (by accidental or designed evolution). Mason argues that the same capacity for ingenuity that has enabled us to build rockets and land on other planets can be applied to redesigning biology so that we can sustainably inhabit those planets. And he lays out a 500-year plan for undertaking the massively ambitious project of reengineering human genetics for life on other worlds. As they are today, our frail human bodies could never survive travel to another habitable planet. Mason describes the toll that long-term space travel took on astronaut Scott Kelly,

who returned from a year on the International Space Station with changes to his blood, bones, and genes. Mason proposes a ten-phase, 500-year program that would engineer the genome so that humans can tolerate the extreme environments of outer space—with the ultimate goal of achieving human settlement of new solar systems. He lays out a roadmap of which solar systems to visit first, and merges biotechnology, philosophy, and genetics to offer an unparalleled vision of the universe to come.

Four Threats Jun 07 2020 An urgent, historically-grounded take on the four major factors that undermine American democracy, and what we can do to address them. While many Americans despair of the current state of U.S. politics, most assume that our system of government and democracy itself are invulnerable to decay. Yet when we examine the past, we find that the United States has undergone repeated crises of democracy, from the earliest days of the republic to the present. In *Four Threats*, Suzanne Mettler and Robert C. Lieberman explore five moments in history when democracy in the U.S. was under siege: the 1790s, the Civil War, the Gilded Age, the Depression, and Watergate. These episodes risked profound—even fatal—damage to the American democratic experiment. From this history, four distinct characteristics of disruption emerge. Political polarization, racism and nativism, economic inequality, and excessive executive power—alone or in combination—have threatened the survival of the republic, but it has survived—so far. What is unique, and alarming, about the present moment in American politics is that all four conditions exist. This convergence marks the contemporary era as a grave moment for democracy. But history provides a valuable repository from which we can draw lessons about how democracy was eventually strengthened—or weakened—in the past. By revisiting how earlier generations of Americans faced threats to the principles enshrined in the Constitution, we can see the promise and the peril that have led us to today and chart a path toward repairing our civic fabric and renewing democracy.

Believing Is Seeing Jan 03 2020 Is your worldview enlightened enough to accommodate both science and God at the same time? Dr. Michael Guillen, a best-selling author, Emmy award-winning journalist and former physics instructor at Harvard, used to be an Atheist—until science changed his mind. Once of the opinion that people of faith are weak, small-minded folks who just don't understand science, Dr. Guillen ultimately concluded that not only does science itself depend on faith, but faith is actually the mightiest power in the universe. In *Believing Is Seeing*, Dr. Guillen recounts the fascinating story of his journey from Atheism to Christianity, citing the latest discoveries in neuroscience, physics, astronomy, and mathematics to pull back the curtain on the mystery of faith as no one ever has. Is it true that "seeing is believing?" Or is it possible that reality can be perceived most clearly with the eyes of faith—and that truth is bigger than proof? Let Dr. Guillen be your guide as he brilliantly argues for a large and enlightened worldview consistent with both God and modern science.

Ordering Violence Nov 12 2020 In *Ordering Violence*, Paul Staniland advances a broad approach to armed politics—bringing together governments, insurgents, militias, and armed political parties in a shared framework—to argue that governments' perception of the ideological threats posed by armed groups drive their responses and interactions. Staniland combines a unique new dataset of state-group armed orders in India, Pakistan, Burma/Myanmar, and Sri Lanka with detailed case studies from the region to explore when and how this model of threat perception provides insight into patterns of repression, collusion, and mutual neglect across nearly seven decades. Instead of straightforwardly responding to the material or organizational power of

armed groups, Staniland finds, regimes assess how a group's politics align with their own ideological projects. Explaining, for example, why governments often use extreme repression against weak groups even while working with or tolerating more powerful armed actors, *Ordering Violence* provides a comprehensive overview of South Asia's complex armed politics, embedded within an analytical framework that can also speak broadly beyond the subcontinent.

Reading Classes May 07 2020 Discussions of class make many Americans uncomfortable. This accessible book makes class visible in everyday life. Solely identifying political and economic inequalities between classes offers an incomplete picture of class dynamics in America, and may not connect with people's lived experiences. In *Reading Classes*, Barbara Jensen explores the anguish caused by class in our society, identifying classism-or anti-working class prejudice-as a central factor in the reproduction of inequality in America. Giving voice to the experiences and inner lives of working-class people, Jensen-a community and counseling psychologist-provides an in-depth, psychologically informed examination of how class in America is created and re-created through culture, with an emphasis on how working- and middle-class cultures differ and conflict. This book is unique in its claim that working-class cultures have positive qualities that serve to keep members within them, and that can haunt those who leave them behind. Through both autobiographical reflections on her dual citizenship in the working class and middle class and the life stories of students, clients, and relatives, Jensen brings into focus the clash between the realities of working-class life and middle-class expectations for working-class people. Focusing on education, she finds that at every point in their personal development and educational history, working-class children are misunderstood, ignored, or disrespected by middle-class teachers and administrators. Education, while often hailed as a way to "cross classes," brings with it its own set of conflicts and internal struggles. These problems can lead to a divided self, resulting in alienation and suffering for the upwardly mobile student. Jensen suggests how to increase awareness of the value of working-class cultures to a truly inclusive American society at personal, professional, and societal levels.

How to Prevent Coups d'État Aug 02 2022 In this lively and provocative book, Erica De Bruin looks at the threats that rulers face from their own armed forces. Can they make their regimes impervious to coups? *How to Prevent Coups d'État* shows that how leaders organize their coercive institutions has a profound effect on the survival of their regimes. When rulers use presidential guards, militarized police, and militia to counterbalance the regular military, efforts to oust them from power via coups d'état are less likely to succeed. Even as counterbalancing helps to prevent successful interventions, however, the resentment that it generates within the regular military can provoke new coup attempts. And because counterbalancing changes how soldiers and

police perceive the costs and benefits of a successful overthrow, it can create incentives for protracted fighting that result in the escalation of a coup into full-blown civil war. Drawing on an original dataset of state security forces in 110 countries over a span of fifty years, as well as case studies of coup attempts in Asia, Africa, Latin America, and the Middle East, De Bruin sheds light on how counterbalancing affects regime survival. Understanding the dynamics of counterbalancing, she shows, can help analysts predict when coups will occur, whether they will succeed, and how violent they are likely to be. The arguments and evidence in this book suggest that while counterbalancing may prevent successful coups, it is a risky strategy to pursue—and one that may weaken regimes in the long term.

From Willard Straight to Wall Street May 31 2022 In stark and compelling prose, Thomas W. Jones tells his story as a campus revolutionary who led an armed revolt at Cornell University in 1969 and then altered his course over the next fifty years to become a powerful leader in the financial industry including high-level positions at John Hancock, TIAA-CREF and Citigroup as Wall Street plunged into its darkest hour. From Willard Straight to Wall Street provides a front row seat to the author's triumphs and struggles as he was twice investigated by the SEC—and emerged unscathed. His searing perspective as an African American navigating a world dominated by whites reveals a father, a husband, a trusted colleague, a Cornellian, and a business leader who confronts life with an unwavering resolve that defies cliché and offers a unique perspective on the issues of race in America today. The book begins on the steps of Willard Straight Hall where Jones and his classmates staged an occupation for two days that demanded a black studies curriculum at Cornell. The Straight Takeover resulted in the resignation of Cornell President James Perkins with whom Jones reconciled years later. Jones witnessed the destruction of the World Trade Center on 9/11 from his office at ground zero and then observed first-hand the wave of scandals that swept the banking industry over the next decade. From Willard Straight to Wall Street reveals one of the most interesting American stories of the last fifty years.

Revelation Apr 05 2020 Michael Baker is a 35 year old, natural born, American citizen from Texas, a successful entrepreneur and amateur astronomer. Or, is he? The scientific community mocks him when he publishes the time and coordinates where a supernova will occur. When it occurs, people start wondering who Michael is. The day after his third supernova prediction stuns the world, Michael abruptly takes over every television and radio in the world and announces that he is the Ambassador to Earth from the Intergalactic Confederation of Planets. Earth is facing multiple grave threats and must take immediate action, if there is any hope for humanity's survival. The Confederation has come to help and is willing to intervene, IF world leaders will accept the help the Confederation offers. Set initially on the Big Island of Hawaii, the story circles the globe in search of enough allies to allow the Confederation to work on humanity's behalf. It is a riveting epic of alien first contact that features uplifting and sometimes humorous accounts of humanity's first interactions with intelligent extraterrestrial life, and it reveals as much about the people of Earth as it does of those who have come to save it. If you like Arthur C. Clarke's *Childhood's End*, or the movie *Avatar*, then you will love this book. It tells the story of the aliens walking among us, and their purpose here on Earth. Rich characters, touching stories, advanced technologies, political insight... an intelligent book that appeals to Science Fiction fans and anyone that enjoys a good story. It is the first book in the Ascendancy series, which tells the story of humanity's ascent into intergalactic civilization.

The Vagina Monologues Jul 01 2022 Drawing on conversations with hundreds of women about their genitalia, the author presents a collection of performance pieces from her one-woman show of the same name.

Advancing Environmental Education Practice Dec 14 2020 In this important intervention, change-agent Marianne E. Krasny challenges the knowledge-attitudes-behavior pathway that underpins much of environmental education practice; i.e., the assumption that environmental knowledge and attitudes lead to environmental behaviors. Krasny shows that certain types of knowledge are more likely than others to influence behaviors, and that generally it is more effective to work with existing attitudes than to try to change them. The chapters expand the purview of potential outcomes of environmental education beyond knowledge and attitudes to include nature connectedness, sense of place, efficacy, identity, norms, social capital, youth assets, and individual wellbeing. *Advancing Environmental Education Practice* also shows how, by constructing theories of change for their environmental education programs, environmental educators can target specific intermediate outcomes likely to lead to environmental behaviors and collective action, and plan activities to achieve those intermediate outcomes. In some cases, directly engaging program participants in the desired behavior or collective action can lead to changes in efficacy, sense of place, and other intermediate outcomes, which in turn foster future environmental actions. Finally, *Advancing Environmental Education Practice* shares twenty-four surveys that assess changes in environmental behaviors and intermediate outcomes, and provides guidelines for qualitative evaluations.

Anti-Christian Violence in India Apr 17 2021 Does religion cause violent conflict, asks Chad M. Bauman, and if so, does it cause conflict more than other social identities? Through an extended history of Christian-Hindu relations, with particular attention to the 2007-2008 riots in Kandhamal, Odisha, *Anti-Christian Violence in*

India examines religious violence and how it pertains to broader aspects of humanity. Is "religious" conflict sui generis, or is it merely one species of intergroup conflict? Why and how might violence become an attractive option for religious actors? What explains the increase in religious violence over the last twenty to thirty years? Integrating theories of anti-Christian violence focused on politics, economics, and proselytization, Anti-Christian Violence in India additionally weaves in recent theory about globalization and, in particular, the forms of resistance against Western secular modernity that globalization periodically helps to provoke. With such theories in mind, Bauman explores the nature of anti-Christian violence in India, contending that resistance to secular modernities is, in fact, an important but often overlooked reason behind Hindu attacks on Christians. Intensifying the widespread Hindu tendency to think of religion in ethnic rather than universal terms, the ideology of Hindutva, or "Hinduness," explicitly rejects both the secular privatization of religion and the separability of religions from the communities that incubate them. And so, with provocative and original analysis, Bauman questions whether anti-Christian violence in contemporary India is really about religion, in the narrowest sense, or rather a manifestation of broader concerns among some Hindus about the Western sociopolitical order with which they associate global Christianity.

The War That Made the Roman Empire Feb 13 2021 A "splendid" (The Wall Street Journal) account of one of history's most important and yet little-known wars, the campaign culminating in the Battle of Actium in 31 BC, whose outcome determined the future of the Roman Empire. Following Caesar's assassination and Mark Antony's defeat of the conspirators who killed Caesar, two powerful men remained in Rome—Antony and Caesar's chosen heir, young Octavian, the future Augustus. When Antony fell in love with the most powerful woman in the world, Egypt's ruler Cleopatra, and thwarted Octavian's ambition to rule the empire, another civil war broke out. In 31 BC one of the largest naval battles in the ancient world took place—more than 600 ships, almost 200,000 men, and one woman—the Battle of Actium. Octavian prevailed over Antony and Cleopatra, who subsequently killed themselves. The Battle of Actium had great consequences for the empire. Had Antony and Cleopatra won, the empire's capital might have moved from Rome to Alexandria, Cleopatra's capital, and Latin might have become the empire's second language after Greek, which was spoken throughout the eastern Mediterranean, including Egypt. In this "superbly recounted" (The National Review) history, Barry Strauss, ancient history authority, describes this consequential battle with the drama and expertise that it deserves. The War That Made the Roman Empire is essential history that features three of the greatest figures of the ancient world.

Imposing Standards Apr 29 2022 In Imposing Standards, Martin Hearson shifts the focus of political rhetoric regarding international tax rules from tax havens and the Global North to the damaging impact of this regime on the Global South. Even when not exploited by tax dodgers, international tax standards place severe limits on the ability of developing countries to tax businesses, denying the Global South access to much-needed revenue. The international rules that allow tax avoidance by multinational corporations have dominated political debate about international tax in the United States and Europe, especially since the global financial crisis of 2007-2008. Hearson asks how developing countries willingly gave up their right to tax foreign companies, charting their assimilation into an OECD-led regime from the days of early independence to the present day. Based on interviews with treaty negotiators, policymakers and lobbyists, as well as observation at intergovernmental meetings, archival research, and fieldwork in Africa and Asia, Imposing Standards shows that capacity constraints and imperfect negotiation strategies in developing countries were exploited by capital-exporting states, shielding multinationals from taxation and depriving nations in the Global South of revenue they both need and deserve. Thanks to generous funding from the Gates Foundation, the ebook editions of this book are available as Open Access volumes from Cornell Open (cornellopen.org) and other repositories.

We Showed Baltimore Sep 03 2022 In We Showed Baltimore, Christian Swezey tells the dramatic story of how a brash coach from Long Island and a group of players unlike any in the sport helped unseat lacrosse's establishment. From 1976 to 1978, the Cornell men's lacrosse team went on a tear. Winning two national championships and posting an overall record of 42-1, the Big Red, coached by Richie Moran, were the class of

the NCAA game. Swezey tells the story of the rise of this dominant lacrosse program and reveals how Cornell's success coincided with and sometimes fueled radical changes in what was once a minor prep school game centered in the Baltimore suburbs. Led on the field by the likes of Mike French and Eamon McEaney, in the mid-1970s Cornell was an offensive powerhouse. Moran coached the players to be in fast, constant movement. That technique, paired with the advent of synthetic stick heads and the introduction of artificial turf fields, made the Cornell offensive game swift and lethal. It is no surprise that the first NCAA championship game covered by ABC Television was Cornell vs. Maryland in 1976. The 16-13 Cornell win, in overtime, was exactly the exciting game that Moran encouraged and that newcomers to the sport wanted to see. Swezey recounts Cornell's dramatic games against traditional powers such as Maryland, Navy, and Johns Hopkins, and gets into the strategy and psychology that Moran brought to the team. *We Showed Baltimore* describes how the game of lacrosse was changing—its style of play, equipment, demographics, and geography. Pulling from interviews with more than ninety former coaches and players from Cornell and its rivals, *We Showed Baltimore* paints a vivid picture of lacrosse in the 1970s and how Moran and the Big Red helped create the game of today.

The Other Founders Sep 30 2019 Fear of centralized authority is deeply rooted in American history. The struggle over the U.S. Constitution in 1788 pitted the Federalists, supporters of a stronger central government, against the Anti-Federalists, the champions of a more localist vision of politics. But, argues Saul Cornell, while the Federalists may have won the battle over ratification, it is the ideas of the Anti-Federalists that continue to define the soul of American politics. While no Anti-Federalist party emerged after ratification, Anti-Federalism continued to help define the limits of legitimate dissent within the American constitutional tradition for decades. Anti-Federalist ideas also exerted an important influence on Jeffersonianism and Jacksonianism. Exploring the full range of Anti-Federalist thought, Cornell illustrates its continuing relevance in the politics of the early Republic. A new look at the Anti-Federalists is particularly timely given the recent revival of interest in this once neglected group, notes Cornell. Now widely reprinted, Anti-Federalist writings are increasingly quoted by legal scholars and cited in Supreme Court decisions—clear proof that their authors are now counted among the ranks of America's founders.

Fool on the Hill Jul 29 2019 Myth and reality collide on an Ithaca campus "in a comic fantasy of wonderful energy, invention, and generosity of spirit" (Alison Lurie). Stephen Titus George is a young writer-in-residence at Cornell University in upstate New York. An imaginative bestselling author in search of a new story, he's seeing his life as a modern-day fairy tale, and himself as a would-be knight looking to woo a lovely maiden—or two: the bewitching Calliope and his guiding light, Aurora Borealis Smith. However, his happy ending might not be up to him. There's another writer who has a greater influence on campus. Unseen, yet twice as formidable, Mr. Sunshine is an eternal semi-retired deity who's been fashioning his own narrative for centuries. He has all his characters in place—dragons, sprites, gnomes, and villains. And now, finally, his hero. As Mr. Sunshine's world comes to fabulous and violent life, can Stephen decide his own fate if it's already being plotted by a god? An epic of life and death, good and evil, love and sorcery, *Fool on the Hill* lands Matt Ruff happily on the shelf between Tom Robbins and J. R. R. Tolkien for every lover of the "funky and fantastical" (New York magazine). "Inspired . . . rich in flavorful language . . . [a] dazzling tour de force." —San Francisco Chronicle "The plot comes together like a brilliant clockwork toy." —Locus

The Road to Wherever Oct 04 2022 A middle grade road novel about a boy stuck on a summer trip with his offbeat auto-mechanic cousins—a humor- and heart-filled journey that leads the boy to an unexpected

confrontation with some broken-down parts of himself. After eleven-year-old June Ball's dad disappears without so much as a goodbye note, June's mother sends him on the road with his adult cousins, mechanics Thomas and Cornell Ball. The Balls are "Ford Men"; their calling in life is to restore old Ford cars—and only Ford cars—that no longer run. And so begins a summer traveling the highways and byways of America, encountering busted-up Fairlanes, Thunderbirds, and Rancheros. They also encounter the cars' owners, who sometimes need fixing up, too. June doesn't understand his cousins' passion for all things Ford. But at every turn, June realizes that this journey is about more than giving neglected classic cars some much-needed TLC—there's room to care for the broken parts of humans, too. A story of adventure, longing, and growing up from adult novelist, journalist, and All-SEC center for the LSU Tigers, John Ed Bradley.

Vulnerable Communities Jan 27 2022 *Vulnerable Communities* examines the struggles of smaller cities in the United States, those with populations between 20,000 and 200,000. Like many larger metropolitan centers, these places are confronting change within a globalized economic and cultural order. Many of them have lost their identities as industrial or commercial centers and face a complex and distinctive mix of economic, social, and civic challenges. Small cities have not only fewer resources but different strengths and weaknesses, all of which differentiate their experiences from those of larger communities. *Vulnerable Communities* draws together scholars from a broad range of disciplines to consider the present condition and future prospects of smaller American cities. Contributors offer a mix of ground-level analyses and examinations of broader developments that have impacted economically weakened communities and provide concrete ideas for local leaders engaged in redevelopment work. The essays remind policy makers and academics alike that it is necessary to consider cultural tensions and place-specific conflicts that can derail even the most well-crafted redevelopment strategies prescribed for these communities.

The Color of Redemption Oct 12 2020 Raising her family in the turbulent '60s in a segregated rural Alabama town, Katie Parker understood the ugliness of racism and Jim Crow all too well. Her farm, which she shared with her activist husband, became her oasis, her retreat. Here, she had control. Here, she could witness God's handiwork in the beauty of the land. Here, she was at peace. But it was a peace soon to be shattered. After a devastating and horrible event, Katie moves with three of her four children to a relative's house in a majority-white suburb of Los Angeles. Settling in, she was confident she had escaped the horrors of her hometown. But the memory of that horrible event, and the animosity and hatred it stirred in her, were not easily shaken. Though she escaped a segregated Southern town, racism and intolerance were not easily left behind. Oddly enough, it was her granddaughter's addiction to drugs that led Katie on a path causing her to confront her fears and prejudices and face head-on the past that she thought she had left behind. Katie's journey will introduce this generation to the ugly racism of the sixties and confront the racial realities that exist in the church today. *The Color of Redemption* will show readers how to break down these walls that separate Christians and deal with racial prejudice, not from a civil rights perspective, but a Christian world view dictated by the Bible.

The Scholar as Human Nov 05 2022 *The Scholar as Human* brings together faculty from a wide range of disciplines—history; art; Africana, American, and Latinx studies; literature, law, performance and media arts, development sociology, anthropology, and Science and Technology Studies—to focus on how scholarship is informed, enlivened, deepened, and made more meaningful by each scholar's sense of identity, purpose, and place in the world. Designed to help model new paths for publicly-engaged humanities, the contributions to this groundbreaking volume are guided by one overarching question: How can scholars practice a more human scholarship? Recognizing that colleges and universities must be more responsive to the needs of both their students and surrounding communities, the essays in *The Scholar as Human* carve out new space for public scholars and practitioners whose rigor and passion are equally important forces in their work. Challenging the approach to research and teaching of earlier generations that valorized disinterestedness, each contributor here demonstrates how they have energized their own scholarship and its reception among their students and in the wider world through a deeper engagement with their own life stories and humanity. Contributors: Anna Sims Bartel, Debra A. Castillo, Ella Diaz, Carolina Osorio Gil, Christine Henseler, Caitlin Kane, Shawn McDaniel, A. T. Miller, Scott J. Peters, Bobby J. Smith II, José Ragas, Riché Richardson, Gerald Torres, Matthew Velasco, Sara Warner Thanks to generous funding from Cornell University, the ebook editions of this book are available as Open Access volumes from Cornell Open (cornellopen.org) and other repositories.

Performing Power Mar 29 2022 *Performing Power* illuminates how colonial dominance in Indonesia was legitimized, maintained, negotiated, and contested through the everyday staging and public performance of power between the colonizer and colonized. Arnout Van der Meer's *Performing Power* explores what seemingly ordinary interactions reveal about the construction of national, racial, social, religious, and gender identities as well as the experience of modernity in colonial Indonesia. Through acts of everyday resistance, such as speaking a different language, withholding deference, and changing one's appearance and consumer behavior, a new generation of Indonesians contested the hegemonic colonial appropriation of local culture and the racial and gender inequalities that it sustained. Over time these relationships of domination and subordination became inverted, and by the twentieth century the Javanese used the tropes of Dutch colonial behavior to subvert the administrative hierarchy of the state. Thanks to generous funding from the Sustainable History Monograph Pilot and the Mellon Foundation the ebook editions of this book are available as Open Access (OA) volumes from Cornell Open (cornellopen.org) and other Open Access repositories.
