Certified Wireless Network Administrator Official Study Guide: Exam CWNA-106 is the officially endorsed CWNA test prep for the leading wireless certification. Expert authors and CWNEs David D. Coleman and David A. Westcott guide readers through the skills and concepts candidates need to know for the exam, using hands-on methods to convey an in-depth understanding of wireless network administration. Readers should have a basic knowledge of Radio Frequency behavior, experience with WLAN hardware peripherals and protocols, and an interest in designing, installing, and managing wireless networks. Wireless technology is taking over the tech industry, and the demand for competent, certified professionals is far outpacing the supply. A CWNA certification denotes advanced-level proficiency in the field, with a complete understanding of wireless LAN components, features, and function—but the only way to pass the exam is to truly understand the material, not just the talking points. The CWNA: Certified Wireless Network Administrator Official Study Guide thoroughly covers each exam objective, and includes review questions, assessment tests, and exercises to test your skills. Topics include: Radio Frequency technologies, regulations, and standards 802.11 protocols Network implementation and security 802.11 RF site surveying Readers also get access to a suite of study tools including an electronic test engine with hundreds or practice test questions, electronic flashcards, exercise peripherals, and industry White Papers, which serve as valuable backup references. In preparing for the CWNA-106 exam, the ideal study guide should cover all of the exam topics in depth—CWNA: Certified Wireless Network Administrator Official Study Guide does just that, making it an excellent, comprehensive study guide.

CRA Research Administrator Exam ExamFOCUS Study Notes 2018/19 Edition Oct 12 2020 According to the Research Administrators Certification Council, the designation of Certified Research Administrator (CRA) means that an individual has met the requirements of the Research Administrators Certification Council's eligibility requirements and has demonstrated a level of knowledge necessary for a person to be a professional research or sponsored programs administrator. Exam candidates would have to pass the written examination developed by the Council and administered in the form of computer testing by the Professional Testing Corporation. The multiple choice based examination would test a broad base of fundamental information required to meet the demands and responsibilities of the profession. The examination is based on the Council's comprehensive BOK, which includes topics listed in http: //www.cra-cert.org/CRAbodyofknowledge.html Simply put, a research administrator needs to act as: a contract administrator a negotiator a project manager a record keeper a bookkeeper The CRA exam attempts to assess the knowledge of academic researchers via MC questions - this can become a problem as practical researchers are not always skillful in taking MC tests. ALSO, you must understand that the CRA exam is not about research skills. It is about the overall administration and management of the entire research effort. Therefore, a lot of "business management" kinds of concept are tested. Having rich academic research background is not enough - you have to be a good administrator and manager as well. Keep in mind, managing a research project is no different from managing a traditional business project. All business concepts, principles and practices would apply. The BOK of the exam has a huge scope. Expecting full and complete coverage of all the knowledge items from a single source is unrealistic. You should use this book together with other study resources!
