Corporal Punishment in U.S. Public Schools Nov 05 2022 This Brief reviews the past, present, and future use of school corporal punishment in the United States, a practice that remains legal in 19 states as it is constitutionally permitted according to the U.S. Supreme Court. As a result of school corporal punishment, nearly 200,000 children are paddled in schools each year. Most Americans are unaware of this fact or the physical injuries sustained by countless school children who are hit with objects by school personnel in the name of discipline. Therefore, Corporal Punishment in U.S. Public Schools begins by summarizing the legal basis for school corporal punishment and trends in Americans' attitudes about it. It then presents trends in the use of school corporal punishment in the United States over time to establish its past and current prevalence. It then discusses what is known about the effects of school corporal punishment on children, though with so little research on this topic, much of the relevant literature is focused on parents' use of corporal punishment with their children. It also provides results from a policy analysis that examines the effect of state-level school corporal punishment bans on trends in juvenile crime. It concludes by discussing potential legal, policy, and advocacy avenues for abolition of school corporal punishment at the state and federal levels as well as summarizing how school corporal punishment is being used and what its potential implications are for thousands of individual students and for the society at large. As school corporal punishment becomes more and more regulated at the state level, Corporal Punishment in U.S. Public Schools serves an essential guide for policymakers and advocates across the country as well as for researchers, scientist-practitioners, and graduate students.

Hearing on Corporal Punishment Jun 19 2021 A congressional hearing on corporal punishment focused on the emotional and physical impact of corporal punishment on children in the classroom, and highlighted legislation (H.R. 1522) which would prohibit corporal punishment in educational programs funded by the federal government. Statements were presented by the following people: (1) Irwin A. Hyman, Director, National Center for the Study of Corporal Punishment and Alternatives in the Schools; (2) Marian Pokalo, Supervising Physician and Supervising Psychologist, Atlantic Mental Health Center, Atlantic City, New Jersey; (3) George Batsche, President, National Association of School Psychologists; (4) Frederick C. Green, Past President, National Committee for the Prevention of Child Abuse; (5) Arlene Zielke, Vice-President for Legislative Affairs, National Parent Teacher Association; (6) Jimmy Dunne, President, People Opposed to Paddling Students; (7) Robert Fathman, President, National Coalition to Abolish Corporal Punishment in School; and (8) Fredda Brown, Association for the Severely Handicapped. Prepared statements, letters, and supplemental materials related to the subject of corporal punishment are also included. (MM)

Corporal Punishment in Rural Schools Oct 04 2022 This book presents an analysis of corporal punishment practices in rural schools. It examines trends in corporal punishment at rural schools for school years from 1999-2000, 2003-2004, 2005-2006 and 2007-

2008, multiple stakeholders' perspectives on corporal punishment (e.g., school staff, student and parents), and various school-specific factors including alternative discipline practices, school safety efforts, problematic student behaviours, and academic outcomes. In addition to drawing attention to the issue of corporal punishment in rural schools, it equips readers with an in-depth understanding of these practices.

Parenting Matters Mar 05 2020 Decades of research have demonstrated that the parent-child dyad and the environment of the family—which includes all primary caregivers—are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

Beating the Devil Out of Them Jan 15 2021 Based on his studies of over 9,000 families, Murray A. Straus, the foremost researcher on family violence in the world, discusses the extent to which parents in the United States use corporal punishment (such as spanking and slapping) and its effects on their children. The question of whether corporal punishment is an effective method of discipline is hotly debated. Straus contends that this believed-to-be-"minor" form of physical violence is precursor to much violence that plagues our world. Children who are spanked quickly learn that love and violence can go hand in hand. Since spanking is generally done by loving, caring parents for the child's own good a child can learn that hitting is "morally right." Straus describes what he has learned through two decades of research: children who are spanked are from two to six times more likely to be physically aggressive, to become juvenile delinquents, and later, as adults, to use physical violence against their spouses, to have sadomasochistic tendencies, and to suffer from depression. Straus alerts parents to these risks, and argues that spanking adversely affects not only the children who are subjected to it but society as a whole. This groundbreaking book, now available in paperback with a substantive new introduction and new concluding chapter, is essential reading for parents as well as teachers, lawyers, and judges. Professionals in fields such as social work, child protection, delinquency and criminology, psychology, and politics will find it of critical importance.

Global Pathways to Abolishing Physical Punishment Mar 17 2021 This book describes the unfolding of a global phenomenon: the legal prohibition of physical punishment of children. Until thirty years ago, this near-universal practice was considered appropriate, necessary and a parental right. But a paradigm shift in conceptions of childhood has led to a global movement to redefine it as violence and as a violation of children's rights. Today, many countries have prohibited it in all settings, including the home. This remarkable shift reflects profound cultural changes in thinking about children and their development, parent-child relationships, and the role of the state in family life. It has involved actors in many sectors, including academia, government, non-governmental organizations and children themselves. Documenting the stories of countries that have either prohibited corporal punishment of children or who are moving in that direction, this volume will serve as a sourcebook for scholars and advocates around the world who are interested in the many dimensions of physical punishment and its elimination.

The Impact of Punishment on Student Learning: Experiences from Basic and Secondary Education in Tanzania Aug 22 2021

Wissenschaftlicher Aufsatz aus dem Jahr 2012 im Fachbereich Pädagogik - Pädagogische Psychologie, University of Dodoma (Department of Educational Foundations and Continuing Education), Sprache: Deutsch, Abstract: This paper examines various issues regarding to punishment and learning. In the introductory part, the paper clearly describes the concept of punishment. The behaviorism and social cultural theory perspectives to punishment are also discussed in this paper. The reformation, retribution, deterrence, attribution and social control theories of punishment are also identified and comprehensively explained. On the other hand, the paper points out the arguments put forward by those who support and oppose the use of punishment in both homes and schools. The important tips in using punishment, the impacts of punishment on student learning as well as various alternatives to corporal punishment are also examined in this paper. The paper concludes that, corporal punishment should be eliminated because it does not enhance positive student learning instead it brings a lot of negative consequences to both teachers and students.

Corporal Punishment of Children: A Human Rights Violation Oct 24 2021 The core of this book is a detailed analysis of the status of corporal punishment of children, including reasonable spankings by parents, under international human rights law. The analysis leads compellingly to the conclusion that such punishment is indeed a human rights violation, consonant with modern norms about right and decent treatment of juveniles. The book further provides a comparative analysis between the domestic laws of the seventeen

nations that ban all corporal punishment of children and examples of the domestic laws in the countries that still permit some physical chastisement of children.

Corporal Punishment of Children in Theoretical Perspective Feb 25 2022 divDespite being commonplace in American households a generation ago, corporal punishment of children has been subjected to criticism and shifting attitudes in recent years. Many school districts have banned it, and many child advocates recommend that parents no longer spank or strike their children. In this book, social theorist Michael Donnelly and family violence expert Murray A. Straus tap the expertise of social science scholars and researchers who address issues of corporal punishment, a subject that is now characterized as a key issue in child welfare. The contributors discuss corporal punishment, its use, causes, and consequences, drawing on a wide array of comparative, psychological, and sociological theories. Together, they clarify the analytical issues and lay a strong foundation for future research and interdisciplinary collaboration. /DIV

Corporal Punishment Nov 24 2021 The aim of this book is to assess the moral permissibility of corporal punishment and to enquire into whether or not it ought to be legally prohibited. Against the widespread view that corporal punishment is morally legitimate and should be legally permitted provided it falls short of abuse, Patrick Lenta argues that all corporal punishment, even parental spanking, is morally impermissible and ought to be legally proscribed. The advantages claimed for corporal punishment over alternative disciplinary techniques, he contends, are slight or speculative and are far outweighed by its disadvantages. He presents, in addition, a rights-based case against corporal punishment, arguing that children possess certain fundamental rights that all corporal punishment of them violates, namely the right to security of the person and the right not to be subjected to degrading punishment. Lenta's approach is unique in that it engages with empirical literature in the social sciences in order to fully examine the emotional and psychological effects of corporal punishment on children. *Corporal Punishment: A Philosophical Assessment* is a philosophically rigorous and engaging treatment of a hitherto neglected topic in applied ethics and social philosophy.
