Incontri fra Russia e Italia Sep 03 2022 Il libro offre un ampio ventaglio di aspetti della cultura russa da una prospettiva di confronto con altrettanti aspetti della cultura e della realtà italiana. Si tratta di un volume collettaneo composto da saggi di affermati specialisti di differenti ambiti disciplinari che qui si sono focalizzati su momenti significativi dei contatti con la civiltà russa sia del passato, sia della contemporaneità. I cambiamenti epocali intervenuti in Europa e, specificatamente, in Russia, in seguito alla caduta del muro di Berlino hanno inciso notevolmente sulle possibilità di conoscenza diretta fra i due mondi e hanno anche avuto come conseguenza, nell'ultima decina d'anni, importanti modifiche su numerosità e qualità dei corsi universitari di lingua e letteratura russa. Con il mutare della situazione politica mondiale lo studio del russo non è più percepito nel nostro paese come una scelta ideologica o esotica, ma è motivato dalla realtà lavorativa in Italia e all'estero, e da una futura applicazione pratica nella società multiculturale. Di qui è nata l'esigenza di dedicare spazio alla riflessione sui diversi aspetti che la richiesta crescente di apprendimento della lingua russa, accompagnata dalla sua civiltà letteraria, comporta per alcune discipline, russistiche in primo luogo. Il volume è arricchito da saggi di italianistica e arabistica che contribuiscono ad evidenziare i secolari ed inesauribili legami della letteratura e della cultura russa con la cultura italiana e mondiale sia sul piano delle idee sia nella prospettiva dei contatti letterari e culturali.

A Brave New China. The big Change Jan 03 2020 How the Chinese look at themselves, the world, and the challenges of the future. Where is China, What is China: Where are the traditional pigtails of the old mandarins, the Mao's bicycles and his suits? Where are the large families with the many concubines? The stuff that made China for centuries in all the stories Chinese and foreigners told of this huge country is gone. China now is skyscrapers, limousines, fast trains, science fiction airports, bright neon lights that explode in the night more than fireworks. Chinese are changing and have changed beyond recognition. In fact, they have changed so much that they do not see themselves in their present shape, just like an animal going through a metamorphosis. We are in the middle of this huge transformation and we don't know if and when the new shape will stabilize and what impact it will have on the conscience of the Chinese and of the people of the world looking at China. This book is an exploration into this huge revolution that is affecting the whole planet in the biggest way possibly since the fall of the Roman Empire.

Wasteocene Dec 02 2019 Humans may live in the Anthropocene, but this does not affect all in the same way. How would the Anthropocene look if, instead of searching its traces in the geosphere, researchers would look for them in the organosphere, in the ecologies of humans in their entanglements with the environment? Looking at this embodied stratigraphy of power and toxicity, more than the Anthropocene, we will discover the Wasteocene. The imposition of wasting relationships on subaltern human and more-than-human communities implies the construction of toxic ecologies made of contaminating substances and narratives. While official accounts have systematically erased any trace of those wasting relationships, another kind of narrative has been written in flesh, blood, and cells. Traveling between Naples (Italy) and Agbogbloshie (Ghana), science fiction and epidemic outbreaks, this *Element* will take the readers into the bowels of the Wasteocene, but it will also indicate the commoning practices which are

dismantling it.

Scientific Objectivity and Its Contexts May 07 2020 The first part of this book is of an epistemological nature and develops an original theory of scientific objectivity, understood in a weak sense (as intersubjective agreement among the specialists) and a strong sense (as having precise concrete referents). In both cases it relies upon the adoption of operational criteria designed within the particular perspective under which any single science considers reality. The "object" so attained has a proper ontological status, dependent on the specific character of the criteria of reference (regional ontologies). This justifies a form of scientific realism. Such perspectives are also the result of a complex cultural-historical situation. The awareness of such a "historical determinacy" of science justifies including in the philosophy of science the problems of ethics of science, relations of science with metaphysics and social dimensions of science that overstep the traditional restriction of the philosophy of science to an epistemology of science. It is to this "context" that the second part of the book is devoted.

Law-Making in the International Community Sep 30 2019 As the world approaches the end of the twentieth century it becomes clear that the global legal system governing relations between the members of the international community is passing through a period of profound change. The traditional lawmaking techniques, established largely at the beginning of this century, were constituted so as to provide for only gradual reforms within a limited and homogeneous community of states. Faced with a growing number of global problems, the international community has discovered that the traditional legal system lacks effective procedures for rapid generation of new international legal norms. "Law-Making in the International Community" examines to what extent the transformations in the social and the legal infrastructures of the international community have affected the traditional rules, determining how international law is to be made or changed. By focusing on actual state practice, official statements of governments and the pronouncements of the World Court, this book seeks to clarify the content and significance of the existing community consensus concerning the authoritative methods of lawmaking.

On Ugliness Apr 17 2021 Beauty and ugliness are two sides of the same coin; by ugliness we usually mean the opposite of beauty and we often define the first in order to understand the nature of the second. But the various depictions of ugliness over the centuries are richer and more unpredictable than is commonly thought. The striking images and anthological quotations in *On Ugliness* lead us on an extraordinary journey through the passions, terrors and nightmares of almost three thousand years, where acts of rejection go hand in hand with touching instances of empathy, and an aversion to deformity is accompanied by seductive violations of all classical canons. With his

characteristic wit and erudition, Umberto Eco draws on examples in art and literature from ancient times to the present day. Abundantly illustrated with demons, madmen, vile enemies and disquieting presences, with freaks and the living dead, *On Ugliness* is conceived for a vast and diverse readership, and is an invaluable companion volume to *On Beauty*.

Prometheus Aug 29 2019 Prometheus the god stole fire from heaven and bestowed it on humans. In punishment, Zeus chained him to a rock, where an eagle clawed unceasingly at his liver, until Herakles freed him. For the Greeks, the myth of Prometheus's release reflected a primordial law of existence and the fate of humankind. Carl Kerényi examines the story of Prometheus and the very process of mythmaking as a reflection of the archetypal function and seeks to discover how this primitive tale was invested with a universal fatality, first in the Greek imagination, and then in the Western tradition of Romantic poetry. Kerényi traces the evolving myth from Hesiod and Aeschylus, and in its epic treatment by Goethe and Shelley; he moves on to consider the myth from the perspective of Jungian psychology, as the archetype of human daring signifying the transformation of suffering into the mystery of the sacrifice.

Meanings of Violence Jul 09 2020 There are good reasons to look at violence from new perspectives. In its endless manifestations violence is part and parcel of human existence, and is very probably a constituting element of human society. And yet violent action - warfare, penalties, insults, feuding, assault, murder, rape, suicide, sports - remains in all its complexity one of the least understood fields of human social life. The book's contributors identify the symbolic and ritualized aspects of violence, and suggest ways of 'reading' violence as it occurs in the world, whether as violent duelling and age-group violence in Southern Ethiopia, bullfighting in Iberia, cattle rustling in Kenya, guerrilla and militia wars in Colombia, or public executions in China. These case studies suggest that 'violence' is not a simple, universal urge, but is contingent and context-dependent, shaped by social relations of power, force and dominance. To be the victim of violence is a humiliating and frightening experience. But the many ambiguities that occur in the use of violence must be considered, to understand why peace seems only to exist as a contrast to the violation of peace.
